CORPORATE DIRECTORY	61

Dear Shareholder,

It is my pleasure to present to you the Annual Report for Rimfire Pacific Mining NL for the year ended 30 June 2014 financial period. The Company made important progress at Fifield NSW pursuing the dual strategy in both expanding the Sorpresa Gold and Silver project area and accelerating the regional gold and base metal prospects within 6km radius of Sorpresa.

The Company is now proceeding down the path of a maiden resource based on the established mineralisation at Sorpresa whilst recognising that discovery growth still remains at Sorpresa, including possible adjacent repeat mineralised structures.

On the regional scale, significant advances in the Company's prospect portfolio have occurred in the period, particularly at Yoes Lookout, Eclipse Trend, Golden Green Group, Roseneath and Carlisle areas. These five areas have profiles that could be considered comparable to Sorpresa, when it was at a similar early stage of exploration.

The results for the last 12 months in the Fifield district continue to support the Company's opinion that we are witnessing a new emerging gold district of considerable potential and that there is the possibility for this wider 30km² area to host multi-million ounces of gold equivalent mineralisation.

The global financial markets have continued to be extremely challenging. The junior exploration sector, the space in which the Company operates, has been hardest hit in the overall resources sector, and this is reflected by subsequent reduction in the availability of risk capital in the sector as a whole. Whilst the Australian dollar has showed weakness in recent times, this has not acted as a catalyst to improve investor sentiment globally towards the resources sector as the US dollar based pricing is the key price determinant of commodities globally. Accordingly with gold and silver trading at below USD\$1,250/oz and USD19/oz respectively in the last 12 months, this has placed strong pressure on the resource sector share prices.

The Board maintains the view that the exploration sector may have bottomed in the financial markets, although the pace of recovery remains somewhat uncertain. The decision by the Company to adopt a strategy to conduct more field work in tougher times, including the regional activities, has been well justified as the newsflow generated has been an important contributor to the Company maintaining its relatively strong position against many other junior explorers.

Accordingly, the Board has advanced your Company considerably in the last year and during the prior four years:

- ❑ Discovery of the greenfields Sorpresa Gold and Silver System in late 2010
- ❑ Noteworthy high grade gold and silver intersections at Sorpresa
- ❑ Expansion of the discovery at Sorpresa to an approximate 1.5km x 0.4km and open system during 2011~14
- ❑ Considerable advancement in the approximate 25 Regional Prospects within 6km of Sorpresa in 2011~14
- ❑ Ranking and prioritising these Regional opportunities into a "Prospect Pyramid" with appropriate testing underway
- ❑ Establishing the credibility that the Company may be uncovering a new gold district of significance at Fifield
- ❑ Moving to a maiden resource at Sorpresa by the end of 2014 early 2015, possibly to measured status in parts

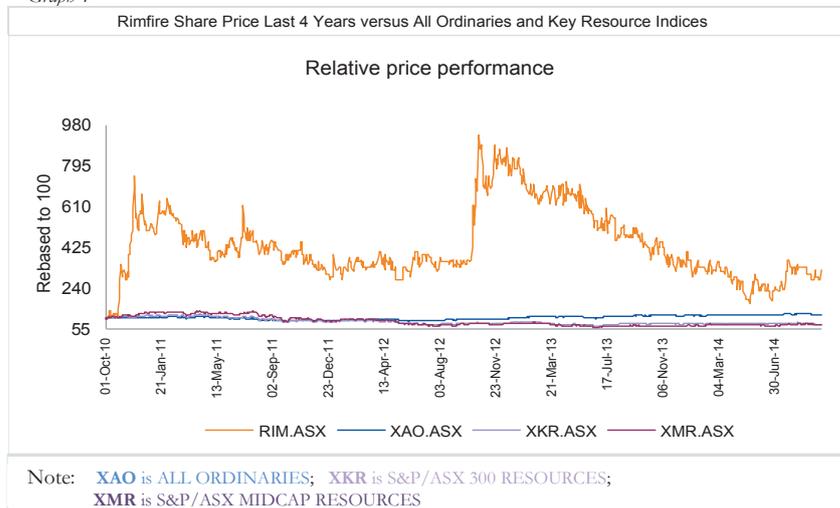

Shareholder funds have been well deployed in achieving these outcomes and improving the Company market value.

The Company's ASX Market Capitalisation grew from \$4.4M in July 2010, to a high of \$50M in November 2012 due to exceptional drill results at that time, before global market corrections have led to a market value of approximately \$20M at the time of this report.

This is a significant achievement in extremely difficult financial markets, well recognised by industry analysts.

Additionally, in the last 4 years the Company share price has outperformed its peers in the Resources Sector and general market as represented by the Sector Indices on the ASX, (*Graph 1*).

Graph 1

The global economic outlook still remains volatile. The Directors have been mindful of this in developing suitable strategies for the Company going forward. Numerous site visits were conducted at Fifield, introducing a range of interested observers to the multiple opportunities that exist within the Company's prospect portfolio. The circumstance may exist to joint venture aspects of the Company's portfolio, and due consideration is being given to this, in terms of shareholder benefit and accelerated outcomes in exploration. The Company also maintains a watching brief on its Platinum prospects in this regard.

During the period, the Company also successfully gained access to new non-dilutive cash sources including the NSW Government sponsored co-operative drilling funds and the AusIndustry R & D program.

The Board of Directors welcomes the new appointment of Mr John Gillett as Non-Executive Director. His depth of project management knowledge, business development expertise, resource industry experience, strong commercial skills and an extremely wide range of senior contacts in the relevant industries provides a valuable addition of skills to the Board.

Undertaking a review of the opportunities, operations and strategy in the period generated important outcomes for the Company. Accordingly, a range of important updated communication materials that conveyed this information to a wider audience of followers was produced and were generally well received in presentation forums.

NSW Mining Conference Presentation	<i>Hyperlink:</i> <u>August 27th 2014 Mining Conference in Orange NSW</u>

Continuing a high standard of community interaction within the Fifield district and receiving local support was considered essential by the Company and was well maintained in the period. This is particularly important now that the Company is looking to establish a resource at Sorpresa, and continue to grow this mineralised footprint, whilst it increases its regional presence. These relationships have been built over a long period of time and are valued by the Company.

It should again be recognised that the important advances made by the Company in the last few years has been due to the dedication and contribution from a wide range of people working with the Company. I would like to express my gratitude for the efforts of my fellow Directors, the Exploration Team, staff, associates and consultants for the diligence, persistence, positive attitude and the support provided. A particular recognition is made to Colin Plumridge who provided much of the inspiration for the Sorpresa mineralisation and the strong foundation that forms the cornerstone knowledge in the regional prospects.

The Board of Directors would like to express their sincere thanks to shareholders who have demonstrated their knowledgeable support as the Company makes further progress on its transitional journey, along the high risk road from mineralised prospecting, to discovery, moving to growth and resource establishment, whilst aiming for a commercial outcome in the process.

I look forward to providing important updates on your Company in the next period.

Yours Sincerely,

John Kaminsky
Executive Chairman
Dated 3rd October 2014

FIFIELD PROJECT AREA EXPLORATION

As at the 30th of June 2014 the Fifield Project Area, located at Fifield in Central Western NSW, comprises the following licences for exploration or development. In addition the Company owns 210 hectares of freehold at Fifield, which covers much of the historic Platinum workings in the district.

Exploration Licences - EL7959 EL5534 EL5565 EL6241 EL7058 plus 10% free carried interest in EL5958
 Mining Leases - M(C)L 305 M(C)L 306

The Company is conducting greenfields exploration for gold (Au), silver (Ag) and base metals (Cu, Pb, Zn) and also potential sources of the coarse grained platinum (Pt) historically mined in the Fifield area. The Company goal is to create “the establishment of potential open cut minable resource(s) within the currently identified Au, Ag and Pt mineralisation within the 30km² Greater Sorpresa project areas”.

Exploration Summary and Highlights

Exploration activity was expanded during the year with simultaneous discovery growth exploration of the Sorpresa gold and silver system, and the formulation of a large and highly promising regional Prospect Portfolio that has undergone considerable systematic target definition development.

Collectively over 20,000m of drilling (Auger, RAB, and RC) was accomplished during the year, including drilling at regional targets outside of the main Sorpresa area which generated significant intersections.

Significant investment was made in systems, software and hardware in the period, establishing a platform for strong data integration, analysis and planning of industry standard discovery programs within Rimfire’s highly prospective greenfields contiguous 313km² tenement package.

RC Drilling at Roadside Area, Sorpresa

A strong array of multiple large scale, exciting regional targets has been generated in the past 12 months. In parallel the Sorpresa system has been further developed and is now being pursued to resource definition level.

Whilst many junior exploration companies have largely ceased field activities, Rimfire has adopted a countercyclical exploration strategy of “doing more for less” thus advancing Sorpresa and some 25 regional targets in our portfolio efficiently and successfully, to enable the next round of exciting drill targets.

Highlights achieved in the last 12 months at the Sorpresa Gold and Silver project area include:

- Digital compilation and 3D modelling of the mineralisation and lithology revealing structural controls, orientation and multiple discovery growth targets,
- Step out RC drilling of these targets, especially at Roadside which has successfully demonstrated the robustness of Sorpresa system with Au/Ag mineralisation now intersected across a 400m strike, and 400m down dip area.
- Advances were achieved at the Original Sorpresa, Boundary Gate, and Boundary Gate East (BGE) targets.
- This work has provided the Company with confidence to proceed with the engagement of an independent resource consultant to move towards the determination of a Maiden Resource within the currently identified gold and silver mineralised envelope(s) across the Sorpresa project area (approximately 1.5km x 0.4km, at defined locations).
- Highlight intersections at Sorpresa in the reporting period included:**

Hole	Intersection	Including Section	Report dates
Fi 394	26m @ 90g/t Ag from 150m and 26m @ 0.37g/t Au from 150m	1m @ 2.80g/t Au from 157m and 1m @ 439g/t Ag from 157m, and 3m @ 327g/t Ag from 164m	Dec 2013

Fi 366	21m @ 1.11g/t Au from 103m and 12m @ 22g/t Ag from 104m and 10m @ 0.30g/t Au from 128m	12m @ 1.80g/t Au, 0.17% Pb and 0.38% Zn from 104m 1m @ 4.57g/t Au, 311g/t Ag, and 0.81% Zn from 107m 2m @ 0.64g/t Au, 0.12% Pb, 0.31% Zn from 130m	Oct 2013
Fi 338	18m @ 82.6g/t Ag from 18m and 18m @ 0.22g/t Au from 12m and 2m @ 59.8g/t Ag from 42m	6m @ 169.3g/t Ag from 20m	Oct 2013
Fi 369	18m @ 0.50g/t Au from 117m and 18m @ 36g/t Ag from 117m and 1m @ 0.14g/t Au, 0.49% Pb, 2.13% Zn from 153m	3m @ 1.72g/t Au and 139.7g/t Ag from 126m 2m @ 0.72% Pb from 144m	Oct 2013
Fi 342	8m @ 90.2g/t Ag from 16m and 8m @ 0.53g/t Au from 12m	2m @ 206g/t Ag from 20m	Oct 2013
Fi 399	9m @ 1.23g/t Au, and 0.43% Zn from 187m	Incl. 1m @ 7.80g/t Au (Visible Gold) from 187m.	Feb 2014
Fi 398	2m @ 11.39g/t Au from 166m,	Incl. 1m @ 21g/t Au, and 46.8g/t Ag, 2.34% Pb, 0.46% Zn from 166m.	Feb 2014
Fi 397	5m @ 1.32g/t Au from 149m,	Incl. 2m @ 2.34g/t Au from 150m.	Feb 2014
Fi 409	8m @ 99g/t Ag from 165m	Incl. 1m @ 194 g/t Ag	July 2014
Fi 410	12m @ 29g/t Ag and 0.32g/t Au from 161m	Incl. 1m @ 161 g/t Ag	July 2014
Fi 411	37m @ 0.40g/t Au from 148m	Incl. 1m @ 1.02; 1m @ 1.54; 1m @ 1.92 g/t Au	July 2014
Fi 413	5m @ 40g/t Ag from 23m and 13m @ 104g/t Ag and 0.61g/t Au from 44m and 7m @ 2.17g/t Au and 70g/t Ag from 63m	Incl. 1m @ 764g/t Ag and 3.20g/t Au Incl. 1m @ 10.80g/t Au and 72g/t Ag	July 2014
Fi 415	21m @ 0.53g/t Au from 44m	Incl. 2m @ 2.67; 1m @ 2.10 g/t Au	July 2014
Fi 417	9m @ 1.21g/t Au from 149m	Incl. 1m @ 6.38g/t Au	July 2014
Fi 424	10m @ 79g/t Ag and 0.32g/t Au from 55m and 12m @ 0.97g/t Au	Incl. 3m @ 153g/t Ag Incl. 5m @ 1.91g/t Au	July 2014
Fi 425	4m @ 28g/t Ag from 117m and 10m @ 0.70g/t Au from 128m	Incl. 1m @ 2.54g/t Au	July 2014

- Significant discovery growth and extensional targets have been defined via reprocessing and further acquisition of geophysical datasets including highly detailed magnetics, radiometrics, gravity, induced polarization (I.P.), and time domain electro-magnetics (TDEM).
- RC Drill testing of these targets remains ongoing for both shallow oxide extensions and potential repeated lodes.
- Significant advances in the understanding of the mineralisation metal associations, mineral assemblages, paragenesis, geological style and genetic model have been gained to greatly assist discovery growth and exploration targeting.
- Preliminary Metallurgical Test Work** conducted on an extensive and diverse spread of mineralised oxide material at Sorpresa produced highly encouraging results shown in the following table:

RC Drilling at Boundary Gate East with results supporting earlier diamond drilling work done in 2013

Sorpresa Oxide Metallurgical Testing					
Sample ID and Location	Number of 2m Interval Samples used for Composite Sample	Head Assays, g/t		Recovery, %	
		Au	Ag	Au	Ag
Met1 – Roadside *	24	1.22	73	84.3	68.9
Met2 – Trench 31	21	2.82	7.3	96.8	72.6
Met3 – Trench 31 SW	20	2.54	7.9	94.5	78.5

(* Additional test work on the Met1 composite, involving finer grinding and an extended leaching period, resulted in improved recoveries to 89.1% for gold and 72.3% for silver).

Sorpresa – Moving Towards A Maiden Resource

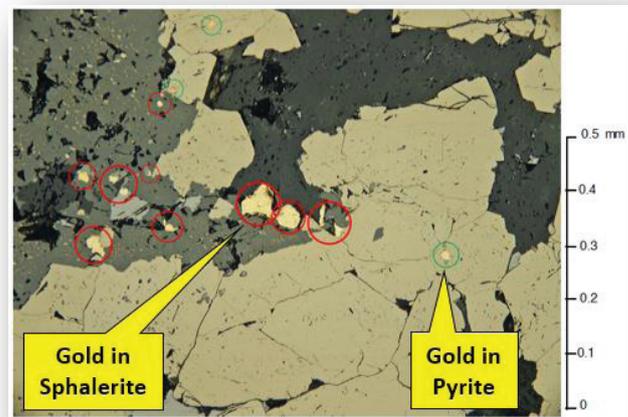

The Sorpresa system has been advanced on multiple fronts this year via digitizing and modelling the mineralisation, grade, strike, dip and plunge geometry in powerful 3D mining software. This intensive work identified a complex mineralised system comprised of structurally controlled, variably dipping and plunging ‘shoots’ of gold and silver mineralisation across a significant 1.5km strike.

An ongoing drill hole re-logging exercise coupled with litho-geochemistry has defined the stratigraphic package host to the mineralization as being a sequence of meta-sediments, quartzite and cherts and andesitic volcanic rocks, generally east dipping and variably folded. A rhyolite to rhyodacite porphyry sill is an important marker position to the mineralisation, with the thickest and highest grade mineralisation generally occurring underneath the sill.

3D wireframing of this unit has helped to successfully predict the mineralised position, and has revealed gentle folding and faulting as potential focuses for higher grade.

The mineralisation itself has undergone examination via petrology and multi-element analysis which shows that the host meta-siltstone and quartzite was hydrothermally altered with a quartz / sericite / muscovite / carbonate / pyrite mineral assemblage, and crackle brecciated which was then cemented with carbonate, sulphide, and gold.

Sulphide mineralisation hosting gold and silver comprise: Pyrite = arsenopyrite > sphalerite > galena >> tennantite – tetrahedrite > chalcopyrite and native gold. Native Gold formed as ~2 – 50um grains with moderately high fineness (i.e. Au > Ag). Gold occurs as inclusions in Sphalerite with some in Pyrite and Galena, whereas Silver occurs in Galena and Tennantite – Tetrahedrite. Later deformation remobilised some base-metals and native gold.

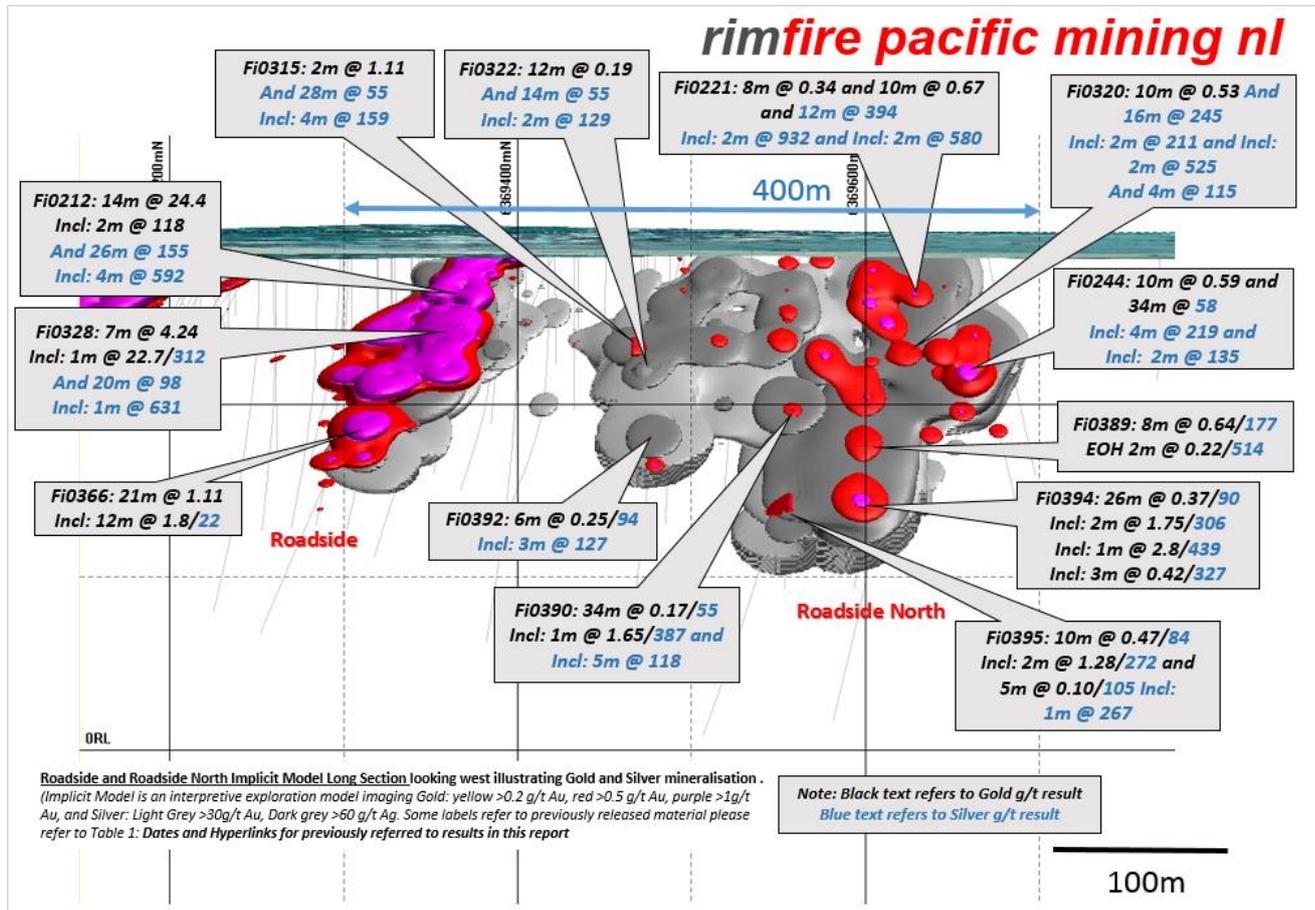

The mineralisation has a low temperature of formation indicating an epithermal setting and is currently interpreted to represent a **Carbonate Base Metal Epithermal Au/Ag style**. Age dating of the host stratigraphy and mineralisation is set to commence, however, current interpretations suggest mineralisation could be related to Siluro-Devonian Volcanism (e.g. Mineral Hill / Mt Boppy) potentially hosted in Cambro-Ordovician metasediments + mafic volcanics and ultramafic intrusives, themselves potential hosts to Tritton / Besshi style VMS mineralisation. Examples of both styles of mineralisation have now been interpreted across the Fifield district.

Structurally the mineralisation is predominately confined to a variably east dipping, gently folded, variably plunging mineralised plane. **This plane shows remarkable continuity down dip and along strike**, however, the grade within the plane is somewhat enigmatic, although has a capacity to deliver exceptional bonanza grades of gold and silver. As an exploration target, the mineralised plane coupled with the rhyolite porphyry sill ‘marker horizon’ and greater detailed understanding of the stratigraphy, has enabled, and will continue to enable broad step out drilling reducing drill intensity.

Scoping for high grade lenses and pods, changes in orientation and folding within the larger mineralised plane is an exciting exploration target for extensions and repeat lenses close to the known mineralisation and far beyond to the east. Such targets are continuously being identified and explored.

Sorpresa Mineralisation (Roadside location) Shown as a Long Section Looking West as an Implicit 3D Model

Regional Exploration

The discovery of Sorpresa was greatly assisted by the fact that the mineralisation breaches the surface, thus allowing subsequent soil and auger geochemistry (2010) to define drill targets. Given the success of the first rounds of drilling (2011~12), Sorpresa was the immediate priority of the Company at that time.

It was, however, soon recognized that Sorpresa was likely just a small component of a larger gold expression being seen in the adjacent district. Accordingly, the strategy was adopted to pursue the underlying prospectivity of the broader geological setting within an approximate 6km radius of Sorpresa, leading to greater regional exploration this year. The foundation for this work was well established in the prior years by Colin Plumridge. Additional personnel, and greater understanding of the Sorpresa system allowed for the smooth expansion of this important regional work.

The recent advances in understanding and identification of the key criteria pertinent to “Sorpresa style” mineralisation and other potential styles of mineralisation contemplated in this geological setting, has formed the basis for an extensive review, rating and prioritisation process of every single mineral occurrence, historical working, conceptual target and prospect within Rimfire’s tenement package to grow the pipeline for new targets in parallel with the known Sorpresa mineralisation.

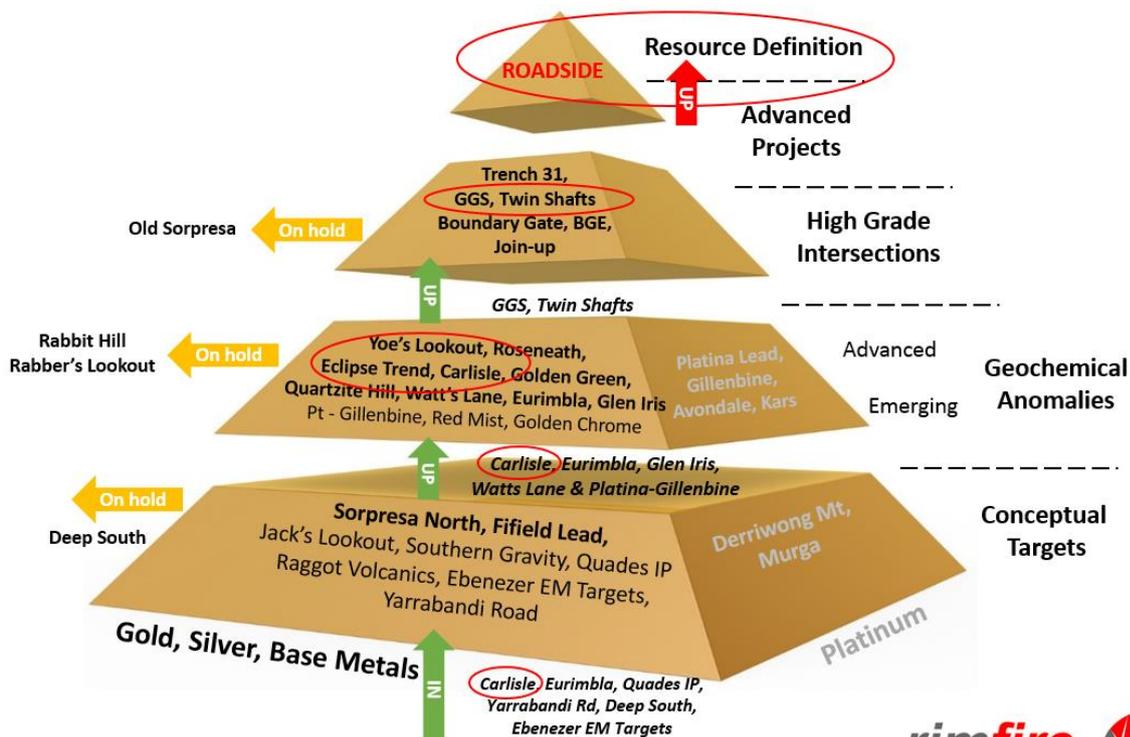

This process revealed 25 variably defined and high quality targets, which were ranked to form a disciplined **Prospect Pyramid Portfolio**. The pyramid directs the application of exploration efforts, budget, strategy and timing to ensure the most efficient and quickest prospect advancement in line with the Company’s stated strategy.

The Company believes that this process has delivered its objectives and within a very short timeframe and has successfully added 5 very high quality and large scale targets that are drill ready, or close to this. These 5 prospects compare favourably with Sorpresa at a similar early stage of development, prior to initial RC drilling.

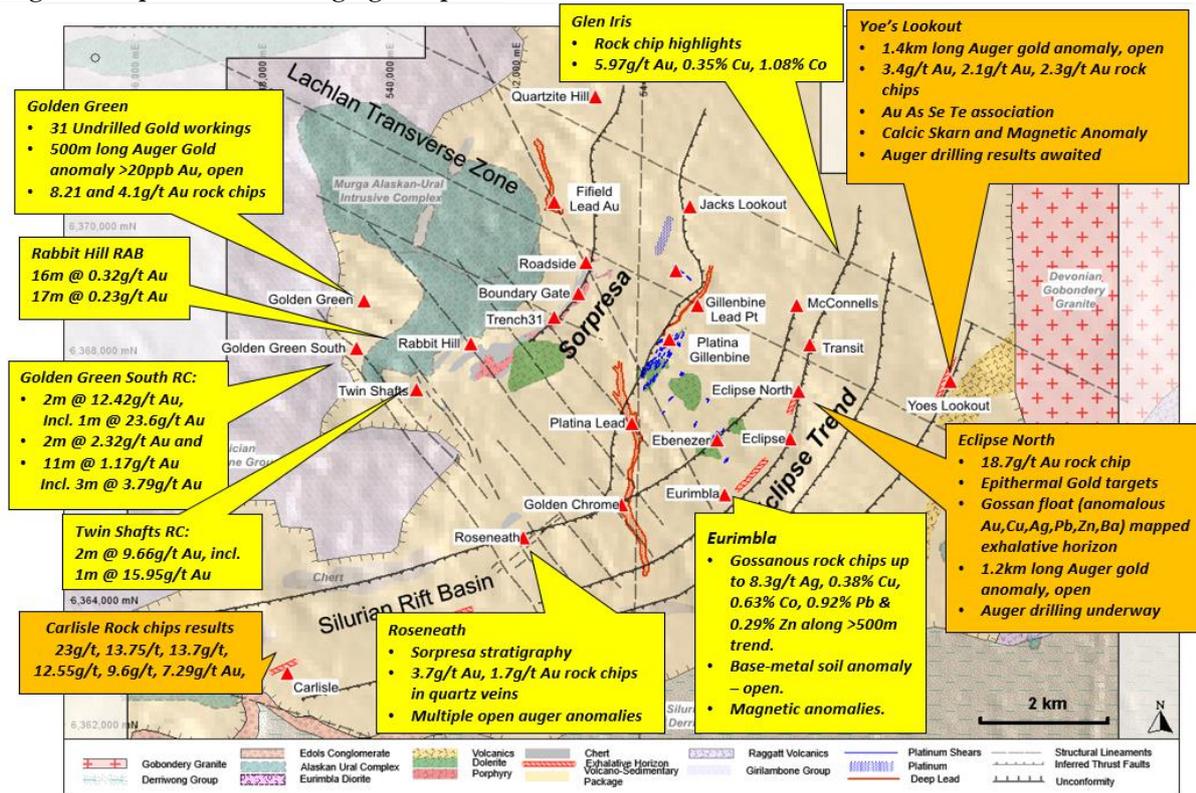

The balance of prospects forms a very strong pipeline of emerging targets and additional new opportunities. This is a significant achievement in the period for the regional program development and compliments the Sorpresa work.

Highlights from the greater focus, investment and upscaling of regional exploration include:

- Advancement of variably prospected mineral occurrences, conceptual targets and historical workings into defined multidisciplinary gold and base metal anomalies of significant scale and amplitude.
- **Complete review, ranking and prioritisation** of all project wide regional targets from conceptual, early geochemical anomalies, historical workings to advanced targets into a disciplined **Prospect Pyramid**. Subsequent targeted exploration has greatly enhanced multiple targets, with staged work programs underway.
- A significant advancement for regional target definition and the next round of target generation has been enabled with the execution of a highly detailed combined **airborne Magnetic and Radiometric survey**. The survey comprised 2,968 line kms at 35m flight height and 40m line spacing, and provides coverage across all priority regional targets. Prospect scale 3D inversion modelling has also been completed.
- Extensive systematic grid Auger drilling to basement (4,429m) completed across 4 target areas has defined multi-element geochemical anomalies with coincident multidisciplinary dataset anomalies, namely the **Eclipse Trend, Yoe's Lookout, Roseneath and Golden Green**.
- Reconnaissance geological mapping and rock chip sampling returned significant results from areas where no previous exploration has been conducted and added new targets to the portfolio. **High grade outcropping mineralisation up to 23g/t Au and 13.75g/t Au (Carlisle)**, and gossans have been observed and sampled illustrating the underexplored nature of the Fifield District.
- Limited RC drill testing of higher priority regional targets has generated significant and high grade intersections, greatly enhancing the broader prospectivity of the emerging *Polymetallic* Fifield District. Highlight intersections from regional targets this year included:
 - 2m @ 12.42g/t Au from 42m, Incl; 1m @ 23.60g/t Au from 42m, (Fi 0401 – Golden Green South),
 - 2m @ 2.32g/t Au from 35m and, 11m @ 1.17g/t Au from 72m, Incl; 3m @ 3.79g/t Au from 75m, (Fi 0452: Golden Green South),
 - 2m @ 9.66g/t Au from 58m, Incl; 1m @ 15.95g/t Au from 58m, (Fi 0405: Twin Shafts),
 - 16m @ 0.32g/t Au from 0m, Incl; 8m @ 0.57g/t Au from 4m, (FiRAB0272 – Rabbit Hill RAB).
 - 17m @ 0.23g/t Au from 4m, Incl; 4m @ 0.50g/t Au from 8m (FiRAB0271 – Rabbit Hill RAB).

Regional Exploration – Emerging Prospects

Yoes Lookout – 6km East of Sorpresa

Exploration at the **Yoe's Lookout** target has generated two high priority drill targets based on geological reconnaissance, historic percussion drilling, rock chip, soil and auger geochemistry and the new geophysical surveys (magnetic and radiometric).

Target 1 is a significant >1.4km long gold in auger geochemical anomaly @ >20ppb Au, up to 1,620ppb Au which is open to the south. The gold anomaly is spatially associated with up to 3.4g/t Au in rock chips, quartz-pyrite stockwork veining in banded silica - magnetite - hematite - pyrite quartzite / low grade BIF horizons. A historic RC drill traverse returned an encouraging 9m @ 0.52g/t Au, incl. 2m @ 1.6g/t Au, even considering these holes did not test discrete magnetic high anomalies along a NNE structural corridor considered to represent gold bearing magnetite rich host stratigraphy. Target 1 is considered a structurally controlled, sediment (BIF) / greenstone hosted, orogenic gold target.

Target 2 is a NNE striking linear magnetic high anomaly (800m x 200m), associated with an up to 200m wide zone of pervasive silica alteration defined in auger drilling, peripheral skarn float with sulphide – magnetite alteration and peripheral tonalite intrusive float. Prospect scale 3D magnetic inversion modelling has been undertaken to accurately site drill targets. A semi-coincident Au in auger geochemical anomaly @ >20ppb Au, up to 59ppb Au & 0.13% Cu is present and the target is considered a possible 'blind' skarn / porphyry Cu-Au target or 'blind' BIF hosted orogenic gold target.

Eclipse Trend – 3.5km East of Sorpresa

A considerable amount of detailed exploration has been rewarded at the **Eclipse Prospect**. A potential zoned polymetallic Low Sulphidation Epithermal system, within a large hydrothermally altered, quartz – feldspar porphyry sub-volcanic intrusive centre is interpreted, which is now defined over >1.2km x 0.6kms, open and undrilled. Extensive low sulphidation epithermal quartz-chalcedony-carbonate-barite-sulphide vein & gossanous breccia float is observed with high grade gold up to 18.7g/t Au, plus 2.4g/t Au, 32g/t Ag and 0.62% Cu, 0.78% Pb.

Three potential drill targets have emerged at Eclipse;

Target 1 is a discrete Ag-Pb-Zn-Cu-Au-Co-Ba rich breccia & semi-massive sulphide target with a greater than 900m long silver-lead auger anomaly. Anomalous precious & base-metals in gossanous rock chips were returned (up to 32g/t Ag, 0.62% Cu, 0.78% Pb & 0.23% Zn) associated with a thumbprint magnetic high anomaly in a possible fold hinge.

Multi-element analysis enabled use of innovative alteration indexes (Ishihara Alteration Index (AI) and Elura / Cobalt-type Alteration Index) which have successfully vectored to a high priority drill target.

Target 2 is greater than 800m long Au-Cu-(±Bi-Ag-Ba) auger anomaly (>20ppb Au, up to 550ppb Au & 1,650ppm Cu), interpreted as a Au-Cu rich epithermal lode which remains open to the south.

Target 3 is a linear 400m long Au – As ± Zn auger anomaly, interpreted to represent Au-As-Zn rich epithermal vein structures. This anomaly is also open in multiple directions, with further auger drilling in progress.

Sectioned rock samples from Eclipse showing important textures and features

Roseneath – 4km South of Sorpresa

Follow up geological reconnaissance of strongly anomalous gold in a single soil sampling traverse discovered significant Gold up to 3.7g/t Au in brecciated quartz-limonite (after sulphide) stock-work veined and pyritic quartzite outcrops.

This area known as Roseneath gold prospect, occurs within the emerging NE-SW trending “Fifield Central Gold Corridor” which includes the Eclipse, Yoes and Carlisle gold prospects. Auger geochemical drilling on a 100m x 20m grid was deployed to define the bedrock source of gold rich quartz vein float samples and soil results, which has been successful in defining several gold anomalies @ >15ppb Au (up to 90ppb Au).

The Gold in auger anomalies are open in multiple directions, with the largest anomaly currently >300m long x >40m wide & spatially associated with a quartz-feldspar porphyry sill. Additional infill and extensional auger drilling is planned after crop harvest, aimed to progress the emerging targets to drill ready status.

Working exploration models at Roseneath based on the surface geology and geochemistry, include; Structurally controlled, sediment hosted Orogenic gold, or Epithermal carbonate base metal Au-Ag style, **analogous to Sorpresa based on similar host rock stratigraphy**, mineralisation style & auger geochemical anomalism.

Golden Green Group – 3km West of Sorpresa

An RC drill program consisting of eleven holes for 968m returned significant results at the **Golden Green group** of gold prospects. The drill holes targeted historic gold workings mined into the 1940’s at Golden Green South and Twin Shafts.

The target is a structurally controlled, sediment hosted, orogenic gold deposit, amenable to open pit mining as shallow oxide satellite pits to any potential operation at Sorpresa.

Late shear zone hosted quartz-pyrite-arsenopyrite vein lodes cut the stratigraphy and are associated with gold mineralisation. Significant gold intersections were returned from RC drilling at Golden Green South.

The highly encouraging results at this prospect provides support that future drilling proposed at the largest of the historical workings, Golden Green, could also generate similar intersections. Golden Green is a set of up to 31 mapped workings over a 200m strike, reportedly mined down to 40m deep.

Rock chip sampling returned an impressive 8.21g/t Au result and auger drilling has defined a **500m long, open gold anomaly @ < 20ppb Au**. In addition a conceptual Gold, Cu, Ni, PGE target has emerged from the auger drilling.

Rimfire RC rig operating at Golden Green

Auger Drilling Geochemistry within 6km radius of Sorpresa Gold and Silver System

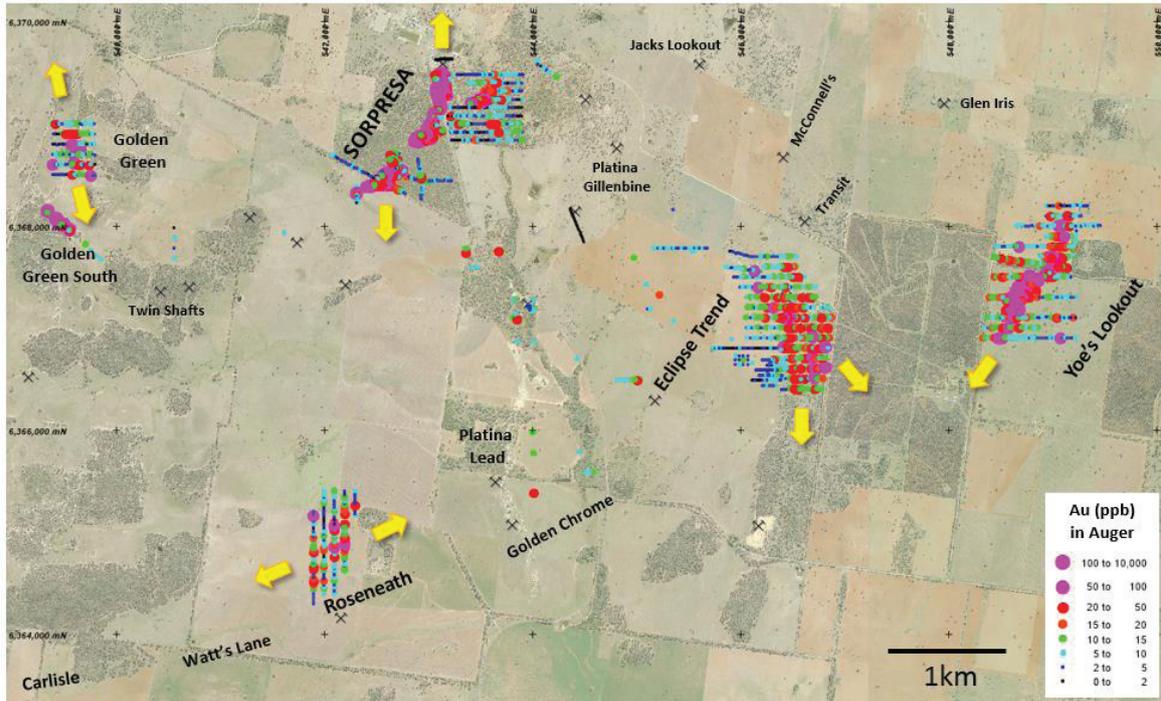

Table of Comparison of more Advanced Prospects within 6km Radius of Sorpresa Projects								
Location	Rock Chip g/t Au	Typical Soil ppb Au	Typical Auger ppb Au	Anomaly Length	RC Drill Au g/t	Open	Other	Historic Workings
Sorpresa	8.8	10~50	20~1,000	1.5km	14 @ 24.4	yes	IP/Gravity	Minor
Yoes Lookout	3.4	10~300	20~1,000	1.0km	N/A	yes	Magnetic Feature	No
Eclipse	18.7	N/A	20~500	1.2km	N/A	yes	Ag	Minor

Roseneath	3.7	8~300	15~80	0.8km	N/A	yes	Sorpresa Style?	No
Carlisle	23.0	9~50	N/A	0.8km	N/A	yes	Magnetic Feature	Minor

The regional work has now established a foundation for expansion in the next periods and is an important element of the Company prospect portfolio strategy to help mitigate risk by reducing dependency on any one area. This is a sensible approach given the high risk nature of exploration in general. The Company has worked hard to achieve over a number of years.

Concluding Remarks – Looking Forward

The move towards a resource at Sorpresa is an important next phase for the Company within 2014 to early 2015. It is, however, not a pure end in itself, but likely part of an ongoing dynamic process with the Company looking to achieve discovery growth within, and adjacent to the Sorpresa mineralisation. Whilst important progress has been made, there is still more to learn on the complexity of the mineralizing system.

The Company goal is to achieve economic parameters associated with its mineralisation discoveries, and this is kept in the forefront of consideration for the ongoing exploration programs. It should again be remembered that “discovery” is a potential value creator for the Company, so the regional work remain a critical component. The Fifield area is well supported with access to infrastructure and skills suitable for any possible mining so this adds further validity to the process.

Shareholders should be encouraged by the results achieved in this period, building upon the results in prior periods. A Company Making opportunity exists within the 6km radius of Sorpresa incorporating the regional prospects, and remains an aspiration for the Company. This is based on the strengthening foundation established in the work to date, with the growing credentials of the Fifield area to host a multimillion ounce gold equivalent outcome, which continues to be pursued.

Competent Persons Declarations

The information in the report to which this statement is attached that relates to Exploration Results is based on information compiled by Colin Plumridge and Darren Glover. Both gentlemen are deemed to be Competent Persons and are Members of The Australasian Institute of Mining and Metallurgy.

Mr Plumridge has over 40 years' experience in the mineral and mining industry. Mr Plumridge is employed by Plumridge & Associates Pty. Ltd. and is a consulting geologist to the Company. Colin Plumridge has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Colin Plumridge has previously consented to the inclusion of the matters based on his historic information in the form and context in which it appears.

Mr Glover is employed by Rimfire Pacific Mining and has 18 years' experience in the mineral and mining industry. He has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Glover consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Historic information & previously published material under 2004 JORC standard referenced in this report:

The information provided in "About Rimfire Pacific Mining" is extracted from the reports entitled and listed in the table below created on the dates shown and is available to view additionally on the Company Website at hyperlink: [ASX Announcements](#). The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement.

In addition, the Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements which operated under the 2004 JORC reporting requirements. Mr Colin Plumridge was the Competent Person at that time and consented to the inclusion in the original reports in the form and context in which it appeared, please refer to the Competent Persons declaration above for additional information.

Your Directors present their report on the company and its controlled entity for the financial year ended 30 June 2014.

Directors

The names of Directors in office during the whole of the financial year and up to the date of this report:

Graham Billingham
John Kaminsky
Ramona Enconniere
Thomas Burrowes

Mr John Gillett was appointed a director subsequent to the end of the financial year on 16 July 2014 and continues in office at the date of this report.

Principal Activities

The principal activities of the consolidated entity during the financial year were the exploration and development of economic mineral deposits.

Review of Operations

The Company continued to make steady progress in the last year, with work focused exclusively in the 30km² area at Fifield NSW, which includes the Sorpresa gold (Au) and silver (Ag) project area and the regional prospects located within 6km radius of Sorpresa.

A countercyclical strategy was adopted, to perform more field work in the tougher global market conditions, therefore allowing visible news flow and operational results to continue to build, despite the difficult market trading environment.

The Sorpresa Gold and Silver project area continued to expand with additional drill intersections achieved. The Company is now seeking to establish a resource on the known areas of mineralisation whilst continuing to search for growth in the mineralisation potential in adjacent areas.

Important outcomes in the reporting period included:

- Significant growth in the mineralisation at Roadside location, within Sorpresa, which remains open
- Expansion of the Sorpresa system potential at BGE
- Examining new data for extensions and repeat lodes at Sorpresa, to the east and south
- Additional geophysical data sets including a new detailed magnetic survey were integrated, providing new insights
- A high quality prospect portfolio of 25 targets were generated and ranked within the 6km radius of Sorpresa
- The advancement of 5 regional prospects representing high order gold anomalies, with sizable surface expression
 - o Yoes Lookout, Eclipse Trend, Roseneath, Golden Green Group and Carlisle
 - o These represent a drill ready and robust prospect pipeline

The Company believes that the “wider project area” of 30km² has multi-million ounce gold equivalent potential and the current process of seeking the establishment of a resource at Sorpresa, coupled with further discovery growth, will see the Company move further down this path over the next 1~2 years.

The role of discovery exploration is considered very important and the Company will continue to examine the larger mineralizing picture at Fifield in parallel with the work at Sorpresa as a core strategy.

Metal zoning remains an observed feature of the regional Fifield geology. This is well highlighted in the Eclipse and Yoes Lookout areas more recently. Major advances continue to be made by the Company in understanding the mineralisation setting and its promising potential at Fifield, however, still recognising that the company remains on a learning curve on this highly complex geological system.

The price of gold traded in a band of approximately USD1,200/oz to USD1,400/oz during the period. More recently, gold and silver were again trading at the lower end, at below USD\$1250/oz and USD19/oz respectively. In the Company's view, the commodity outlook represents limited downside risk for gold and silver at these prices, particularly with the global financial environment which remains somewhat uncertain.

Mr John Gillett became an additional Non-Executive Director to the Board of the Company in July. Mr Gillett's considerable engineering, project and resources experience across a wide array of jurisdictions provides additional skills to the Board at this time of growth for the Company.

The Board of Directors is grateful to all the personnel, partners, contractors and stakeholders contributing to the advancement of the Company projects in the period.

Financial Position

The net assets of the consolidated entity have increased from \$11,050,241 at 30 June 2013 to \$12,077,162 at 30 June 2014. The Company continued to ensure that overhead costs during the financial year were carefully monitored.

The Company was successful in raising further capital (approx. \$3.285m) with a placement and an SPP in September 2013. The Board sincerely acknowledges new and existing shareholders who participated in these finance rounds.

Additionally, the Company was able to attract support for its application for AusIndustry R&D Funding, which provided approximately \$1.163m in further funds. The Company has been awarded a grant from the NSW Department of Resources and Industry, for New Frontiers Co-operative Drilling funds, which will provide a contribution of approx. \$175,000 towards new drilling programs in the next 12 months, applied to the greater Sorpresa area.

The Exploration Sector financial markets have undergone a major correction in the last 18 months, with declines in both liquidity and value for most listed companies. The Company's share price recovered from its low points in April and June 2014, with improved market sentiment and increased news flow from operations gaining recognition. Other seasonal factors such as the financial year end tax realisations leading to June 30, impacted to provide weaker trading conditions also.

Despite this, the Company's shares have performed above the market sector indices for the last 4 years, and outperformed many peers, in difficult trading conditions. Whilst risk capital appears to be returning to markets, as demonstrated with recent price upswings, markets remain fragile, and it is not yet clear if the turning point now observed will reflect modest continued improvements or a sustained sideways movement based on further conservative sentiment.

Future Developments, Prospects and Business Strategies

The Company remains committed to the emerging potential of the gold and silver mineralisation observed within the Fifield district, including beyond the immediate confines of the known gold and silver mineralisation at the Sorpresa project.

The regional potential at Fifield has been further enhanced in the last 12 months. The key prospects, currently 25 or more, reside within an approx. 6km radius of Sorpresa, and are viewed as highly prospective for gold, with base metal and platinum potential also recognised. In addition, the extensional growth potential immediately adjacent to the known Sorpresa mineralisation exists to the East, South and a new area potentially to the West.

The Company continues to methodically prospect these many areas as quickly and as effectively as possible, providing quality target development leading to deeper drilling, as appropriate, and building satellite project inventory at Fifield, wherever possible. The Carlisle area is an excellent example of the growing regional potential, and whilst at an early stage, has produced an excellent gold anomalous area, with up to 23g/t gold in rock chips.

The known gold and silver mineralised positions at Sorpresa are now undergoing examination for a resource establishment, which the Company envisages will be part of a dynamic process.

Although under consideration for a lengthy period of time, the Platina Lead structure still represents a potentially attractive lower order commercial platinum target (with associated gold). Permitting is in place for an initial technical and commercial assessment. Potential partners were being sought during the current period. It is likely that the Company would gain insights into the mineralised platinum bedrock system operating and the Sorpresa style gold system, during any assessment of the Platina Lead.

Operating Results

The loss of the consolidated entity amounted to \$2,216,830 (2013: \$655,477).

Dividends

No dividends were paid during the financial year, nor are any recommended at 30 June 2014.

No Significant Changes in State of Affairs

The Sorpresa Gold and Silver discovery at Fifield provides the core focus for the Company going forward. The Platinum potential remains important.

After Balance Date Events

No other matters or circumstances which have arisen since the end of the financial year have significantly affected or may significantly affect the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future financial years.

Environmental Issues

The consolidated entity aims to ensure that the highest standard of environmental care is achieved. The Board maintains the responsibility to ensure that the consolidated entity's environment policies are adhered to and to ensure that the consolidated entity is aware of and is in compliance with all relevant environmental legislation. There have been no environmental breaches during the 2014 financial year.

Information on Directors

<p>John Kaminsky Executive Chairman and Director <i>Bachelor of Applied Science (Chemistry) (RMIT), MBA (Melbourne Business School)</i></p>	
<p>Experience And Expertise</p>	<p>John was appointed Director of Rimfire Pacific Mining NL and Axis Mining NL in April 2004. He brings strong strategic and international skills to the company and has more than 20 years' experience in international trade, including chemicals, plastics, metals, minerals, ores, concentrates and energy products. He assumed the role of Executive Chairman in December 2004.</p>
<p>Other Current Directorships</p>	<p>None.</p>
<p>Former Directorships in Last 3 Years</p>	<p>None.</p>
<p>Special Responsibilities</p>	<p>Chairman of the board. Member of the Audit and Remuneration Review Committee (alternate to G Billingham).</p>

<p>Graham Billingham Non-Executive Director and Secretary</p>	
<p>Experience And Expertise</p>	<p>Graham was appointed Director of Rimfire Pacific Mining NL and Axis Mining NL in May 1999. He comes to the Board with an extensive background in investment banking and corporate development in the Australasian region. As an investment banker and finance director, he brings to the Board extensive corporate, financial and commercial expertise.</p>
<p>Other Current Directorships</p>	<p>None.</p>
<p>Former Directorships in Last 3 Years</p>	<p>None.</p>
<p>Special Responsibilities</p>	<p>Member of the Remuneration Review Committee.</p>

Ramona Enconniere Non-Executive Director <i>Bachelor of Commerce (University of Melbourne), MBA (Melbourne Business School)</i>	
Experience And Expertise	Ramona was appointed Director of Rimfire Pacific Mining NL in May 2005. She has professional affiliations with the Australian Society of CPA and the Australian Institute of Banking and Finance. She makes an excellent contribution to the Board through her experience gained in corporate banking and the funding of mergers and acquisitions, loan syndications, project financing, debt raising via capital markets/securitisation with Citibank, Bank of America, OCBC (Overseas-Chinese Bank Corporation) and National Australia Bank.
Other Current Directorships	None.
Former Directorships in Last 3 Years	None.
Special Responsibilities	Chair of the Remuneration Review Committee. Member of the Audit Committee.

Thomas Burrowes Non-Executive Director <i>Bachelor of Economics (Hons), MBA (Melbourne Business School)</i>	
Experience And Expertise	Thomas was appointed Director of Rimfire Pacific Mining NL in December 2010. He has accrued extensive operational and management experience at Board level within junior Australian resource companies over the past 25 years. After an initial career in funds management he has held executive directorship positions in 7 resource companies. He makes a valuable contribution with his depth of resource industry experience, public company involvement, exploration knowledge, financial market understanding, new project awareness and a wide range of industry contacts
Other Current Directorships	None.
Former Directorships in Last 3 Years	Stellar Resources Limited 2004 – May 2014 (Non-Executive Director).
Special Responsibilities	Chair of the Audit Committee.

John Gillett Non-Executive Director <i>Bachelor of Engineering Civil (Hons), Diploma of Business Management, FIE Aust, MICE (UK), CEng, MAICD</i>	
Experience And Expertise	John was appointed Director of Rimfire Pacific Mining NL in July 2014. He is a professional civil engineer with business experience in the resources industry, infrastructure and services to government over a 40 year period. He has gained company director, management, business development and project experience in large corporate and multinational businesses. He has lived and worked in Australia, USA, UK and Indonesia. John's areas of expertise include strategic and business planning for new businesses, feasibility studies, environmental impact studies, approvals, design and project/construction management for mining, water, transport and building projects. In addition, he brings sound commercial judgement, risk management skills, experience in regulatory compliance and government relationships to the board.
Other Current Directorships	None.
Former Directorships in Last 3 Years	None.
Special Responsibilities	None.

Meetings of Directors

During the financial year, meetings of Directors were held as detailed below. Attendances by each Director during the year were:

	Directors' Meetings		Audit Committee Meetings		Remuneration Committee Meetings	
	Number Eligible to Attend	Number Attended	Number Eligible to Attend	Number Attended	Number Eligible to Attend	Number Attended
John Kaminsky	4	4	2	2	1	1
Graham Billingham	4	4	-	-	1	1
Ramona Enconniere [#]	4	2 [#]	2	1	1	1
Thomas Burrowes	4	4	2	2	-	-

Absence due to illness

Shares held beneficially:

John Kaminsky	21,015,503
Graham Billingham	-
Ramona Enconniere	1,668,333
Thomas Burrowes	1,009,302
John Gillett	-

Shares in which there is a relevant interest:

John Kaminsky	5,322,666
Graham Billingham	16,548,837
Ramona Enconniere	7,498,837
Thomas Burrowes	-
John Gillett	581,000

Options

No options were issued during the current financial year (2013: Nil).

The remuneration report, which has been audited, outlines the key management personnel remuneration arrangements for the consolidated entity, in accordance with the requirements of the Corporations Act 2001 and its Regulations.

The remuneration report is set out under the following main headings:

- Principles used to determine the nature and amount of remuneration
- Details of remuneration for the year ended 30 June 2014
- Service agreements
- Share-based compensation
- Additional information

Principles used to determine the nature and amount of remuneration

The remuneration policy of Rimfire Pacific Mining NL has been designed to align Director and executive objectives with shareholder and business objectives by providing a fixed remuneration component and offering specific longer term incentives based on key performance areas affecting the consolidated entity's financial results. The Board of Rimfire Pacific Mining NL established a Remuneration Committee to allow the Company to maintain its ability to attract and retain the best executives and Directors to run and manage the consolidated entity, as well as create goal congruence between Directors, executives and shareholders.

This policy is now under review, particularly with the growing needs of the Company, to create a better alignment to industry practices for remuneration. The Remuneration Review Committee has been looking at suitable benchmarking to apply to the Company's Board and executive management, and has an initial determination that the Company has remunerated in the lowest quartile of the industry, whilst the Company has performed in the top quartile, using various measures of assessment.

The Government's negative policy operating in the last few financial periods concerning share and option incentives has been a major impediment to establishing reasonable remuneration structures for the higher risk industries, which include exploration. The lack of flexibility in remuneration structure is an area for policy review in the Company's opinion.

The Board's historic policy used for determining the nature and amount of remuneration for Board members and senior executives in this reporting period of the consolidated entity is detailed below. The remuneration policy, setting the terms and conditions for executive directors and other senior executives, was approved by the Board. The executives are entitled to receive a mix, as determined by the Committee, of base salary (which is based on factors such as capability, effectiveness, work tasks, responsibilities, length of service and experience), superannuation, fringe benefits and securities, subject to any necessary shareholder or regulatory approvals.

The Board reviews executive and non-executive packages by reference to the consolidated entity's performance, executive and non-executive Director performance and comparable information from industry sectors including other listed companies in the resources sector. This review is still underway at the time of this report.

With respect to executive appraisal, key aspects of performance criteria have included the maintenance of an adequate level of operating capital, maximising the economic cycle and managing expenditure to efficient levels, particularly in difficult global conditions. Developing and retaining exploration personnel expertise, therefore enabling the best possible examination and enhancement of the Company's exploration portfolio is considered important, and this is done whilst operating to high standards of governance, including work place safety.

Managing investor relations and Company communication with all stakeholders, including shareholders, analysts, capital providers, landholders and government departments is considered a key benchmark. Ensuring an environmentally sensitive approach to exploration programs is maintained is a measured outcome, thus minimising any potential liabilities to the Company.

All of these factors are considered to impact directly on the performance of the Company and are therefore an important component in the remuneration assessment. These factors are more easily assessed within the review process, than more volatile measures, such as day to day exploration results, commodity price fluctuation and global market sentiment. Overall technical advancement in the exploration potential of the project areas is considered in the remuneration assessment process.

Macro measures as a backdrop to performance review are also relevant, but are not a sole determining factor. Such measures would include key growth indicators of share price, volume of trade, number and stability of shareholders and market capitalisation of the Company. The Company believes the performance review process adopted using these measures ensures a strong alignment between Board and executive performance and that of the underlying performance of the Company for a Company of this type. The Committee is further tuning performance criteria as the Company enters the next reporting period, setting explicit measures of performance.

As a junior exploration company other key performance criteria for the Directors and executives relate to their ability to bring ideas, business skills, experience, appropriate networks, capital raising initiatives, promotional strategies, expenditure plans and pursue exploration programs through selection of appropriate technical specialists whilst exercising prudent judgement that can create significant shareholder value. This must all be conducted within modest financial resources, so efficiency and effectiveness are key performance measures by which the executives and Directors need to be assessed. The capacity for multi-skilling amongst executives and the Board is a key attribute.

Key objectives are set by the Board for the Executive Chairman of the Company, and the Board refers to these guidelines and modifies the content according to the specific needs of the Company and its strategies going forward. Performance and objectives for the Executive Chairman have yet to have the review completed for the current reporting period and hence his remuneration awaits review. The Executive Chairman is currently on a roll-over of his previous arrangements with the Company, but this is also under review. There has been no increase in remuneration arrangements from the previous two reporting periods.

Subject to the performance of the Company and a review of the performance and incentives offered to Directors and executives of the Company, an entitlement to participate in share and option arrangements, subject to shareholder approval may also apply. This is designed to align the performance of the Company with the performance of the Board and Executives. Legislative changes, however, caused the Company to seek further advice, with the possible establishment of a performance rights scheme.

All remuneration paid to executives and Directors are valued at cost to the Company and mostly expensed with a small amount capitalised into exploration costs. The Board's policy is to remunerate non-executive Directors at market rates for comparable companies for time, commitment and responsibilities.

The Remuneration Review Committee determines payments to the non-executive Directors and attempts to review their remuneration annually, based on market practice, duties and accountability. Independent external advice may be sought if required. The maximum aggregate amount of fees that can be paid to non-executive Directors is not linked directly to the consolidated entity performance, however, the Board is conscious of its responsibilities and is mindful of the performance of the Company, so has acted accordingly, in formulating remuneration and incentive levels. To align Directors' interests with shareholder interests, the Directors are encouraged to hold shares in the Company.

Details of Remuneration for the Year Ended 30 June 2014

The remuneration for each Director of the consolidated entity and other Key Management Personnel during the year was as follows:

Benefits to senior executives and the non-executive Directors consisted exclusively of cash benefits in the period. A non-executive Director Pool of \$200,000 was available in 2014 (\$120,000 in 2013) and represents the maximum aggregate payments to non-executive Directors, in their capacities as Directors, that can be paid in any one year without requiring additional shareholder approval. The actual non-executive Director pool utilised in the 12 month period was \$90,000 in total (\$90,000 in 2013). This rate is below the industry norm.

Performance Income as a Proportion of Total Remuneration

No performance based bonuses were paid during the year ended 30 June 2014 (2013: nil).

Service Agreements

The Executive Chairman, Mr J Kaminsky, had an arrangement with the Company to provide services, and this was put in place with effect on 1 January 2012. Currently the contract basic conditions have rolled over, and a formal review is to be undertaken shortly.

The Non-Executive Directors have been appointed on an ongoing basis and the company does not have any retirement benefit obligations upon their cessation as a director.

Share Based Compensation of Directors & Executives

No shares or options were granted to Directors or Executives, exercised, expired or held during the years ended 30 June 2014 or 30 June 2013.

Executives

There were no executives other than the Executive Chairman at balance date.

[End of audited Remuneration Report]

Indemnifying Officers

In accordance with commercial practice, the insurance policy prohibits disclosure of the terms of the policy, including the nature of the liability insured against and the amount of the premium.

The Company has not otherwise during or since the financial year, indemnified or agreed to indemnify an officer or auditor of the Company or any related body corporate against a liability incurred as such an officer or auditor.

Directors covered by the Directors & Officers Liability Insurance Policy at the time of this report are:

Mr John Kaminsky
Ms Ramona Enconniere
Mr John Gillett

Mr Graham Billingham
Mr Thomas Burrowes

Proceedings on Behalf of the Company

No person has applied for leave of Court to bring proceedings on behalf of the Company or intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or any part of those proceedings.

The Company was not a party to any such proceedings during the financial year.

Auditor's Independence Declaration

The auditor independence declaration required under Section 307C of the Corporations Act 2001 forms part of this Directors' Report and is included on page 23.

Non-Audit Services

There were no non-audit services provided by BDO East Coast Partnership during the financial year.

Signed in accordance with a resolution of the Board of Directors.

DECLARATION OF INDEPENDENCE BY DAVID GARVEY TO THE DIRECTORS OF RIMFIRE PACIFIC MINING NL

As lead auditor of Rimfire Pacific Mining NL for the year ended 30 June 2014, I declare that, to the best of my knowledge and belief, there have been:

1. No contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
2. No contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of Rimfire Pacific Mining NL and the entities it controlled during the year.

David Garvey
Partner

BDO East Coast Partnership

Melbourne, 30 September 2014

Introduction

The Directors of Rimfire Pacific Mining NL recognise the need for high standards of corporate governance and are focused on fulfilling their responsibilities individually and as a Board to all of the Company stakeholders. The Board supports the guidelines on the “Principles of Good Corporate Governance and Best Practice Recommendations” (“Principles”) established by the ASX Corporate Governance Council.

Given the size and structure of the Company, the nature of its business, the stage of its development and the cost of strict and detailed compliance with all of the recommendations the Company has adopted some modified systems, procedures and practices which it considers allow it to reasonably meet the principles of good corporate governance.

The Company’s practices aim for consistency with the guidelines and recommendations. The Company considers that it has adopted practices that are appropriate to the Company’s circumstance in this regard. At the end of this Corporate Governance Statement a table is included detailing the recommendations with which the Company does not strictly comply, including reasons for departure from any stated Principles.

The following sections outline the Company practices in complying with the Principles.

Principle 1: Laying Solid Foundations for Management and Oversight

The role of the Board is to lead and oversee the management and direction of the Company.

After appropriate consultation with executive management, the Board:

1. Defines and sets its business objectives. It subsequently monitors performance and achievements of the Company’s objectives and that of senior management;
2. Oversees the reporting on matters of compliance with corporate policies and laws, takes responsibility for risk management processes and a review of executive management, remuneration practices and insurance needs of the Company;
3. Monitors and approves financial performance and budgets; and
4. Reports to shareholders.

As part of the execution of their duties, Directors are involved in various subcommittees related to focused aspects of the Company. The Directors are able and encouraged to seek external professional advice as may be required, depending on circumstance.

In addition, Directors have a duty to disclose and appropriately report matters that affect their independence and conform to the Company’s trading policy governing dealings in the Company’s securities, including any related financial instruments.

The Board has delegated all day to day management of the Company to the executive management, subject to any specific expertise requested by management of the Board, on a case by case basis.

During the period, a review of executive performance was undertaken by the Remuneration Committee in accordance with the Company’s stated review process and benchmarking.

Each member of the Board has committed to spending sufficient time to enable them to carry out their duties as a Director of the Company. One third of the Directors retire annually and are free to seek re-election by shareholders.

Principle 2: Structuring the Board to Add Value

Composition of the Board

The ASX Corporate Governance Council recommends that composition of the Board be determined so as to provide a Company with a broad base of industry, business, technical, administrative and corporate skill and experience considered necessary to represent shareholders and fulfill the business objectives of a Company.

The recommendations of best practice are that a majority of the Directors and in particular the chairperson should be independent. An independent Director is one who:

1. Does not hold an executive position;
2. Is not a substantial shareholder of the Company or an officer or otherwise associated directly or indirectly with a substantial shareholder of the Company;
3. Has not within the last 3 years been employed in an executive capacity by the Company or another group member or been a Director after ceasing to hold such employment;
4. Is not a principal of a professional adviser to the Company or another group member;
5. Is not a significant supplier or customer of the Company or another group member, or an officer of, or otherwise associated directly or indirectly with a significant supplier or customer;
6. Has no significant contractual relationship with the Company or any other group member other than as a Director of the Company; and
7. Is free from any interest and any business or other relationship which could or could reasonably be perceived to materially interfere with the Directors ability to act in the best interests of the Company.

It is considered that a majority of independent Directors is the optimal composition to add value to the Company. This is due to the size and nature of the Company's business and the risk profile of the Company. Corporate Governance practices are in place to support competent and objective operation of the Board and to provide investor assurance in relation to Board decision making.

As a junior exploration company, the key performance criteria for the Directors and executives relate to their ability to bring ideas, general business skills, experience, appropriate networks, risk assessment skills, capital raising initiatives, promotional strategies, expenditure plans and to pursue exploration programs through appropriately selected technical specialists whilst exercising prudent judgment that can create significant shareholder value. This must all be conducted within modest financial resources, so efficiency and effectiveness are key performance measures by which the Directors are assessed.

The Board regularly discusses and reviews its performance. The chairperson also discusses with each Director their requirements, performances and aspects of involvement in the Company. The Non-Executive Directors discuss and evaluate the role fulfilled by management individually and together. This is reviewed against the discussed and agreed objectives of the Company and the effectiveness in carrying out those objectives.

Nomination of Other Board Members

Due to the small size of the Company, no Nomination Committee exists currently, this function is adopted by the Board of Directors, which at least annually, reviews its composition to determine if additional core strengths are required to be added to the Board in light of the nature of the Company businesses and its objectives. The selection process takes into consideration the skills and experience of proposed Directors with an attempt to gain sufficient diversity amongst Directors to add value to the Company.

Independent Advice

Each of the Directors is entitled to seek independent advice at Company expense to assist them to carry out their responsibilities.

Principle 3: Promotion of Ethical and Responsible Decision-Making

Directors, officers, employees and consultants to the Company are required to observe high standards of behaviour and business ethics in conducting business on behalf of the Company and they are required to maintain a reputation of integrity on the part of both the Company and themselves. The Company does not contract with or otherwise engage any person or party where it considers integrity may be compromised.

Directors are required to disclose to the Board actual or potential conflicts of interest that may or might reasonably be thought to exist between the interests of the Director or the interests of any other party in so far as it affects the activities of the Company and to act in accordance with the Corporations Act if conflict cannot be removed or if it persists. That involves taking no part in the decision making process or discussions where that conflict does arise.

Directors, staff and insiders are required to make disclosure of any share trading. A formal Trading Policy was released to the ASX at the end of 2010. The cornerstone of the Company policy in relation to share trading is that officers, employees and contractors are prohibited from trading whilst in possession of unpublished price sensitive information concerning the Company. That is information which a reasonable person would expect to have a material effect on the price or value of the Company securities. An officer must discuss the proposal to acquire or sell shares with the Chairman prior to doing so to ensure that there is no price sensitive information of which that officer might not be aware. The undertaking of any trading in securities by Directors must be notified to the Company and Chairman who makes disclosure to ASX within the required reporting time-table guidelines.

An extract of the Trading Policy is provided as follows:

A Representative in possession of price sensitive information which is not generally available to the market must not deal in the Company's securities at any time, either directly, or indirectly.

In addition, each Representative is permitted to trade in the Company's securities throughout the year **except** during designated closed periods. The closed periods are between the end of the March, June, September and December quarters and the release of the Company's next quarterly report to the ASX, so long as the Company is required by the Listing Rules to lodge quarterly reports.

Certain trading activity is not subject to the policy such as transfers to super funds where the transferor maintains the beneficial ownership of the securities. **The full list of acceptable trading activity is listed in the full policy document as released in December 2010 to the ASX.** There are exceptional circumstances where trading can occur outside the policy in cases of specific hardship. These details are outlined in detail in the full policy document.

The Company does not have a formal diversity policy, given the size of the Company at this point in time. However, the Company applies the common sense principle that the person of the right experience, skills and aptitude for a particular vocational need will be chosen for a vacancy within the Company. This has resulted in diversity in the work place as "a natural outcome", rather than a formulated approach.

Board Composition by Gender			
Executive Directors		Non-Executive Directors	
Male	Female	Male	Female
1	Nil	2	1

Senior Executive Composition by Gender	
Male	Female
1	Nil

Principle 4: Safe Guarding Integrity in Financial Reporting

An Audit Committee operates within the Company.

The committee consists of the following:

T Burrowes (Chair)	Non- Executive Director
R Enconniere	Non- Executive Director
J Kaminsky	Executive Director

The main responsibilities of the Audit Committee are to:

1. Review the annual financial statements with the Executive Chairman and the external auditors and make appropriate recommendations to the Board;
2. Review all regular financial reports to be made to the public prior to their release and make appropriate recommendations to the Board;
3. Monitor compliance with statutory and Australian requirements for financial reporting;
4. Review reports from management and external auditors on any significant proposed regulatory, accounting or reporting issues, to assess the potential impact on the Company's financial reporting process.

The Executive Chairman is required to state in writing that the Company's Financial Reports present a true and fair view in all material respects of the Company's financial condition and operational results in accordance with relevant accounting standards.

The committee is also charged with the responsibilities of recommending to the Board the appointment, removal and remuneration of the external auditors and reviewing the terms of their engagement and the scope and quality of the audit.

An analysis of fees paid to the external auditors, including a breakdown of fees of non- audit services, is provided in the notes to the financial statements. It is the policy of the external auditors to provide an annual declaration of their independence to the Board.

Each Board member has access to the external auditors and the auditor has access to each Board member.

Principle 5: Making Timely and Balanced Disclosure

The Executive Chairman has been nominated as the person responsible for communications with the Australian Securities Exchange (ASX). This role includes responsibility for ensuring compliance with the continuous disclosure requirement in the ASX Listing Rules and overseeing and co-coordinating information disclosure to the ASX, analysts, brokers, shareholders, the media and the public.

All material information concerning the Company, including its financial situation, performance and ownership are posted on the Company web site to ensure all investors have equal and timely access.

Principle 6: Respecting the Rights of Shareholders

The Board recognises its responsibility to ensure that its shareholders are informed of all major developments affecting the Company.

All shareholders who nominate to do so receive a copy of the Company's annual report. The annual, half yearly and quarterly reports are prepared in accordance with the ASX Listing Rules and are posted on the Company's web site. Regular updates on operations are made via ASX releases, including access to any audiocast or video materials.

Information on the Company is posted on the Company's website. This amongst other information includes all text in relation to any notices on meetings to be held by the Company. When analysts are briefed on aspects of the Company's operation, the material used in the presentation is released to the ASX and posted on the Company's website.

The Company has maintained its website during the past year, inclusive of the last 3 years of all ASX release materials, which also incorporates financial information in this time. The website includes the option for shareholders to contact the Company for clarification and receive direct updates of Company matters.

The external auditor is requested to attend the annual general meeting and be available to answer shareholder questions about the conduct of the audit and the preparation and content of the audit report.

Principle 7: Recognising and Managing Risk

A key element of the Board's role is the assessment of risk and the subsequent management of risk. Key risk areas for the Company include, amongst other things, exploration success and subsequent commercialisation risk, financial markets and economic cycle risk, commodity risk and key personnel risk. These are reviewed on a continuous basis and then specifically reviewed again at each Board meeting.

The issue with respect to risk in exploration is one of balancing the potential rewards with the cost of conducting adequate exploration programs. The Company employs a number of strategies to mitigate its risks including considering the farming out of exploration prospects, acquiring more information in order to better define targets within exploration prospects and maximising the use of lower cost exploration techniques. The Company utilises industry standard drafting techniques and software to map, log and assess its prospects for ongoing exploration suitability. Peer review of prospects, by both internal and third party consultants, is used when considered necessary, to consider exploration assumptions at various times.

The Company would be subject to commodity and currency price fluctuation through the sale of commodities denominated in \$US. The Company monitors certain commodity and currency movements and possible methods available to manage any such movements in price risk. However, the Company has no consistent current commercial production at this time, except potential by product from bulk sampling programs, so the Board does not consider price risk to be a significant factor at this time. Interest rate risk is assessed according to reporting guidelines.

The Board is responsible for approval of the acquisition and disposal of exploration and development interests. The Board is also responsible for overseeing identification and development of strategies to mitigate price risk, including hedging and also asset protection and potential liabilities via insurance.

The Company has in place internal control processes, and undertakes such modifications as are necessary to ensure reasonable levels of control are maintained.

Monitoring the performance of the Company's financial status and matching this adequately to the current business and economic cycles are key areas for Board risk assessment. Authorisation of equity raisings, entering into debt facilities and major capital expenditure or commitments require Board approval. All routine operating expenditures are the responsibility of management in accordance with programmes and budgets approved by the Board.

The Company currently has personnel of less than 10, which does not include an internal audit function. In relation to its responsibilities the Board's consideration includes the following:

1. Review of internal controls and recommendations for enhancements
2. Monitoring of compliance with the Corporations Act 2001, Australian Securities Exchange, Australian Taxation Office and Australian Securities and Investments Commission requirements
3. Improving the quality of the management and accounting information
4. Follow-up and rectification by management of deficiencies or breakdown in controls or procedures.

The board receives annually, the assurance from the Executive Chairman by signed declaration.

Principle 8: Remunerate Fairly and Responsibly

A Remuneration Committee operates within the Company.

The committee currently consists of the following:

- R Enconniere (Chair)
- G Billinghamurst
- J Kaminsky (and alternate G Billinghamurst)

The Remuneration Review Committee makes recommendations to the Board on remuneration packages and other terms of employment. Reviews are conducted annually, or earlier if required, by the committee having regard to performance and relevant comparative information. As well as a base salary, remuneration packages may include superannuation, termination entitlements, fringe benefits, incentives, bonus and securities.

Remuneration packages should be set at levels that are intended to attract and retain high calibre staff and align the interest of the executives with those of the Company shareholders. Remuneration of Non-Executive Directors is treated separately and determined by the Board within the maximum amount approved by the shareholders from time to time. Currently, the annual pool established for maximum payments to Non- Executive Directors, in their capacity as Directors is \$200,000 (2013: \$120,000) in aggregate.

There are no retirement benefits afforded to Non- Executive Directors beyond statutory superannuation entitlements that may have accrued. Further information on Directors' and Executives' remuneration is set out in the Directors' Report and Remuneration Report.

Table of Departures and Explanations (from the recommendations of the ASX Corporate Governance Council)

Recommendation Reference (Principle Number reference)	Departure from Recommendation	Explanation for Departure
2.2 & 2.3	The Chairman is an Executive Director and has a substantial associated shareholding in the Company and therefore does not meet the test of independence.	The Board believes that the Chairman is able to act competently and diligently in the best interests of the Company.
2.4	No separate Nomination Committee currently exists.	As a small Company, it is considered more practical for the Board as a whole to take on the responsibility for new Director nomination ideas.
2.5 and 2.6	There has been no formal disclosure of the process for performance evaluation of the Board, committees, individual Directors and key Executives. There is no separate section on the Company website currently devoted to Corporate Governance.	Given the size of the Company and the involvement of all four Directors a policy has not been required to date. The Directors continually monitor and discuss performance.
3.1	No formal code of conduct has been established as to practices necessary to maintain confidence in the Company integrity or as to reporting and investigating unethical practices. Similarly, There has been no disclosure of the code of conduct to deal with compliance for legal or other obligations to legitimate stakeholders.	It is not considered that a code of conduct or reporting guide is yet necessary. The business practices adopted by the Board recognise that proper compliance with legal and other obligations is mandatory for all Directors and the Company as a whole.

3.2 and 3.3	No formal policy exists for work place personnel diversity, which includes gender diversity.	It is not considered that a formal diversity policy is required, given the small size of the Company and its work force. The principles are followed to the extent that the appropriate skill, experience, aptitude and competence are the key criteria for personnel selection. The practices adopted by the Board recognise that proper compliance with legal and other obligations is mandatory for the Company as a whole.
4.2	The structure of the Audit Committee comprises 3 Directors, both Executive and Non- Executive Directors, but has a majority of Non-Executive Directors.	Given the size of the Company, it is appropriate in the Board's opinion to include the Executive Chairman within the Audit Committee. A Non-Executive Director is the Chairperson of the Audit Committee.
4.3	The Audit Committee does not have a formal charter.	Given the size of the Company, the entire Board works intimately with the Executive management and Audit Committee. The Board feels that adequate procedures are in place and that a formal audit charter is not necessary at this time.
5.1	Limited written policy and procedure exists to ensure that compliance with ASX Listing Rules disclosure requirements are met at senior management level.	There is only one senior Executive of the Company and the Board does not consider that a written policy is at this time required. It will be reviewed as the activities of the Company increase.
6.1	The Company has no formally designed or disclosed communication strategy with shareholders, beyond ensuring continuous disclosure is met. The ASX announcement platform is the main basis for communication with shareholders.	The Board is conscious of the need to continually keep shareholders and markets advised. The procedures adopted within the Company, although not written, are weighted towards informing shareholders and markets.
7.1 and 7.2	There has been no written implementation of policy on risk oversight and management or for senior management to make statements to the Board concerning those matters. However, risk assessment discussion is an integral part of management and the Board's activities on a regular basis.	Given the nature and size of the Company, its business interests and the involvement of all Directors who all have business management skills, it is not considered necessary to establish this practice at this time. Each member of the Board is in regular contact with senior exploration management, to assist the understanding of this key business risk.
7.3	The Company receives a statement of compliance under Section 295A concerning the integrity of the financial statements from the Executive Chairman, but the Company has no Chief Financial Officer given the size of the Company.	The Company complies with the spirit of the guidelines in this regard, but given the small size of the Company, it is not envisaged an internal financial officer would be appointed in the immediate future. The Company and Board work with the Company's external auditors and accountants to ensure a suitable compliance statement is authorised.

Note 1 **Notes to the Consolidated Financial Statements**

The financial report is a general purpose financial report that has been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations and other authoritative pronouncements of the Australian Accounting Standards Board and the Corporations Act 2001.

Rimfire Pacific Mining NL is a profit orientated entity for the purpose of the financial report.

The financial report covers the economic entity of Rimfire Pacific Mining NL and its controlled entity. Rimfire Pacific Mining NL is a listed public company, incorporated and domiciled in Australia.

The principal activities of the consolidated entity during the financial year were the exploration and development of economic mineral deposits.

The financial report of Rimfire Pacific Mining NL and its controlled entity, complies with International Financial Reporting Standards as issued by the International Accounting Standards Board.

The following is a summary of the material accounting policies adopted by the economic entity in the preparation of the financial report. The accounting policies have been consistently applied, unless otherwise stated.

The financial report was authorised for issue by Directors on the date of signing the directors' declaration.

The financial report is presented in Australian dollars, has been prepared on an accruals basis and is based on historical costs.

Accounting Policies

a. Significant Judgements and Key Assumptions

Judgements made in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements concern the future successful exploration and development of mining tenements including the saleability of mined resources.

The following key assumption has been made concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

It is assumed that the mining tenements currently being explored by the consolidated entity will be successfully developed with minerals being produced and commercially sold on the market at some future point, as yet unspecified. The production of saleable minerals is assumed to be at least sufficient to recover the costs of exploration and development. Should this assumption prove incorrect then material adjustments may have to be made for impairment losses in respect of capitalised exploration costs.

b. Going Concern

The consolidated entity incurred an operating loss of \$2,216,830 and had cash outflows from operating activities of \$240,577 for the year ended 30 June 2014. The ability of the consolidated entity to continue as a going concern is dependent on a number of factors, one being the continuation and availability of funds. These conditions indicate a material uncertainty that may cast significant doubt about the consolidated entity's ability to continue as a going concern.

The financial report has been prepared on the going concern basis, which contemplates the continuity of normal business activity and the realisation of assets and the settlement of liabilities in the normal course of business for the following reasons:

- As at 30 June 2014, the consolidated entity had cash and cash equivalent of \$2,355,073.
- Directors have a number of external funding alternatives available such as a farm-out of exploration commitments or raising additional equity funds. The Company has a history of successfully undertaking capital raisings during the last 10 years.
- The Board also has the ability to defer or reduce operating activities and exploration expenditure if necessary, whilst meeting minimum tenement expenditure commitments.

Based on the above, directors believe the consolidated entity will continue as a going concern and that it is appropriate to adopt that basis of accounting in the preparation of the financial report.

The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or to the amounts and classification of liabilities that might be necessary should the consolidated entity not continue as a going concern.

c. Principles of Consolidation

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Rimfire Pacific Mining NL as at 30 June 2014 and the results of all subsidiaries for the year then ended. Rimfire Pacific Mining NL and its subsidiaries together are referred to in these financial statements as the 'consolidated entity'.

Subsidiaries are all those entities over which the consolidated entity has control. The consolidated entity controls an entity when the consolidated entity is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the consolidated entity. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between entities in the consolidated entity are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the consolidated entity.

The acquisition of subsidiaries is accounted for using the acquisition method of accounting. A change in ownership interest, without the loss of control, is accounted for as an equity transaction, where the difference between the consideration transferred and the book value of the share of the non-controlling interest acquired is recognised directly in equity attributable to the parent.

Non-controlling interest in the results and equity of subsidiaries are shown separately in the statement of profit or loss and other comprehensive income, statement of financial position and statement of changes in equity of the consolidated entity. Losses incurred by the consolidated entity are attributed to the non-controlling interest in full, even if that results in a deficit balance.

Where the consolidated entity loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The consolidated entity recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

d. Income Tax

The charge for current income tax expense is based on the profit for the year adjusted for any non-assessable or disallowed items. It is calculated using the tax rates that have been enacted or are substantially enacted by the reporting date.

Deferred tax is accounted for using the balance sheet liability method in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on the taxable profit or loss.

Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised or liability is settled. Deferred tax is credited in the consolidated statement of profit or loss and other comprehensive income except where it relates to items that may be credited directly to equity, in which case the deferred tax is adjusted directly against equity.

Deferred income tax assets are recognised to the extent that it is probable that future tax profits will be available against which deductible temporary differences can be utilised.

The amount of benefits brought to account or which may be realised in the future is based on the assumption that no adverse change will occur in income taxation legislation and the anticipation that the economic entity will derive sufficient future assessable income to enable the benefit to be realised and comply with the conditions of deductibility imposed by the law.

Rimfire Pacific Mining NL and its wholly-owned Australian subsidiary have not formed an income tax consolidated group under the tax consolidation regime.

e. Property, Plant and Equipment

Each class of property, plant and equipment is carried at cost less, where applicable, any accumulated depreciation and impairment losses.

Property

Freehold land and buildings are measured on the cost basis, being the amounts which have been paid for the asset.

Plant and equipment

Plant and equipment are measured on the cost basis.

The carrying amount of plant and equipment is reviewed annually by Directors to ensure it is not in excess of the recoverable amount from these assets. The recoverable amount is assessed on the basis of the expected net cash flows which will be received from the assets employment and subsequent disposal. The expected net cash flows have been discounted to their present values in determining recoverable amounts.

Depreciation

The depreciable amount of property, plant and equipment, but excluding freehold land, is depreciated using a reducing balance method commencing from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

The depreciation rates used for each class of depreciable assets are:

Leasehold improvements	15%
Plant and equipment	7.5%-30%
Office furniture	10%-40%
Motor Vehicles	19%

f. Leases

Lease payments for operating leases, where substantially all the risks and benefits remain with the lessor, are charged as expenses in the periods in which they are incurred.

g. Exploration Evaluation and Development Expenditure

Exploration, evaluation and development expenditure incurred is accumulated in respect of each identifiable area of interest. These costs are only carried forward to the extent that they are expected to be recouped through the successful development of the area or where activities in the area have not yet reached a stage which permits reasonable assessment of the existence of economically recoverable reserves. Accumulated costs in relation to an abandoned area are written off in full against profit in the year in which the decision to abandon the area is made.

When production commences, the accumulated costs for the relevant area of interest will be amortised over the life of the area according to the rate of depletion of the economically recoverable reserves.

A regular review is undertaken of each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest.

h. Impairment of Assets

At each reporting date, the group reviews the carrying values of its tangible and intangible assets to determine whether there is any indication that those assets have been impaired. If such an indication exists, the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, is compared to the asset's carrying value. Any excess of the asset's carrying value over its recoverable amount is expensed to the Statement of Profit and Loss and Other Comprehensive Income.

Impairment testing is performed annually for goodwill and intangible assets with indefinite lives.

Where it is not possible to estimate the recoverable amount of an individual asset, the group estimates the recoverable amount of cash-generating unit to which the asset belongs.

i. Employee Benefits

Provision is made for the Company's liability for employee benefits arising from services rendered by employees to reporting date. Employee benefits expected to be settled within one year including entitlements arising from wages and salaries and annual leave, have been measured at the amounts expected to be paid when the liability is settled plus related on-costs. Other employee benefits payable later than one year have been measured at the present value of the estimated future cash outflows to be made for those benefits. Contributions are made by the consolidated entity to employee superannuation funds and are charged as expenses when incurred.

j. Cash and cash equivalents

Cash and deposits, including cash equivalents, comprise cash on hand and cash at bank, deposits at call and those highly liquid investments with an original maturity of three months or less, which are held for the purpose of meeting short term cash commitments rather than for investment purposes, and which are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

For the purpose of the Statement of Cash Flows, cash includes cash on hand and deposits with banks or financial institutions net of bank overdrafts.

k. Trade and Other Receivables

Trade receivables and other receivables are recorded at amounts due less any allowance for doubtful debts.

l. Trade and Other Payables

Trade payables and other payables are recognised when the consolidated entity becomes obliged to make future payments resulting from the purchase of goods and services. Payments are normally settled on 30 day terms.

m. **Financial Instruments**

Recognition

Financial instruments are initially measured at cost on trade date, which includes transaction costs, when the related contractual rights or obligations exist. Subsequent to initial recognition these instruments are measured as set out below.

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are stated at amortised cost using the effective interest rate method.

Financial liabilities

Non-derivative financial liabilities are recognised at amortised cost, comprising original debt less principal payments and amortisation.

Fair value

Fair value is determined based on current bid prices for all quoted investments. Valuation techniques are applied to determine the fair value for all unlisted securities, including recent arm's length transactions, reference to similar instruments and option pricing models.

Impairment

At each reporting date, the group assesses whether there is objective evidence that a financial instrument has been impaired. In the case of available-for-sale financial instruments, a prolonged decline in the value of the instrument is considered to determine whether an impairment loss has arisen. Impairment losses are recognised in the Statement of Profit and Loss and Comprehensive Income.

n. **Revenue Recognition**

Interest revenue is recognised on a proportional basis taking into account the interest rates applicable to the financial assets. All revenue is stated net of the amount of goods and services tax (GST).

o. **Government Grants**

Government grants relating to assets such as capitalised exploration expenditure are recognised in the statement of financial position by deducting the grant in arriving at the carrying amount of the asset. Government grants relating to expenses are recognised in the profit and loss as other income.

p. **Goods and Services Tax (GST)**

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Tax Office. In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the statement of financial position are shown inclusive of GST.

q. **Earnings per share**

Basic earnings per share is calculated by dividing the profit attributable to the owners of Rimfire Pacific Mining NL, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

r. **Segment Reporting**

Operating segments are presented using the 'management approach', where the information presented is on the same basis as the internal reports provided to the Chief Operating Decision Makers ('CODM'). The CODM is responsible for the allocation of resources to operating segments and assessing their performance. Rimfire Pacific Mining NL does not have any separately reportable segments.

s. **Contributed Equity**

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

t. **Equity Settled Compensation**

Equity-settled transactions are awards of shares, or options over shares, that are provided to employees or contractors in exchange for the rendering of services. Equity-settled share-based compensation benefits have been provided to contractors in the current financial year.

The cost of equity-settled transactions are measured at fair value on grant date. Fair value is independently determined using either the Binomial or Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option, together with non-vesting conditions that do not determine whether the consolidated entity receives the services that entitle the employees or contractors to receive payment. No account is taken of any other vesting conditions.

The cost of equity-settled transactions are recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

u. New, revised or amending Accounting Standards and Interpretations adopted

All new and revised Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) that are relevant to Rimfire Pacific Mining NL and its subsidiary's operations and effective for annual reporting periods beginning on 1 July 2013 have been adopted by the consolidated entity.

Any significant impact on the accounting policies of the consolidated entity from the adoption of these Accounting Standards and Interpretations are disclosed below. The adoption of these Accounting Standards and Interpretations did not have any significant impact on the financial performance or position of the consolidated entity.

AASB 10 Consolidated Financial Statements

The consolidated entity has applied AASB 10 from 1 July 2013, which has a new definition of 'control'. Control exists when the reporting entity is exposed, or has the rights, to variable returns from its involvement with another entity and has the ability to affect those returns through its 'power' over that other entity. A reporting entity has power when it has rights that give it the current ability to direct the activities that significantly affect the investee's returns. The consolidated entity not only has to consider its holdings and rights but also the holdings and rights of other shareholders in order to determine whether it has the necessary power for consolidation purposes.

AASB 13 Fair Value Measurement and AASB 2011-8 Amendments to Australian Accounting Standards arising from AASB 13

The consolidated entity has applied AASB 13 and its consequential amendments from 1 July 2013. The standard provides a single robust measurement framework, with clear measurement objectives, for measuring fair value using the 'exit price' and provides guidance on measuring fair value when a market becomes less active. The 'highest and best use' approach is used to measure non-financial assets whereas liabilities are based on transfer value. The standard requires increased disclosures where fair value is used.

AASB 119 Employee Benefits (September 2011) and AASB 2011-10 Amendments to Australian Accounting Standards arising from AASB 119 (September 2011)

The consolidated entity has applied AASB 119 and its consequential amendments from 1 July 2013. The standard eliminates the corridor approach for the deferral of gains and losses; streamlines the presentation of changes in assets and liabilities arising from defined benefit plans, including requiring remeasurements to be presented in other comprehensive income; and enhances the disclosure requirements for defined benefit plans. The standard also changed the definition of short-term employee benefits, from 'due to' to 'expected to' be settled within 12 months. Annual leave that is not expected to be wholly settled within 12 months is now discounted allowing for expected salary levels in the future period when the leave is expected to be taken.

AASB 127 Separate Financial Statements (Revised), AASB 128 Investments in Associates and Joint Ventures (Reissued) and AASB 2011-7 Amendments to Australian Accounting Standards arising from the Consolidation and Joint Arrangements Standards

The consolidated entity has applied AASB 127, AASB 128 and AASB 2011-7 from 1 July 2013. AASB 127 and AASB 128 have been modified to remove specific guidance that is now contained in AASB 10, AASB 11 and AASB 12 and AASB 2011-7 makes numerous consequential changes to a range of Australian Accounting Standards and Interpretations. AASB 128 has also been amended to include the application of the equity method to investments in joint ventures.

AASB 2012-5 Amendments to Australian Accounting Standards arising from Annual Improvements 2009-2011 Cycle

The consolidated entity has applied AASB 2012-5 from 1 July 2013. The amendments affect five Australian Accounting Standards as follows: Confirmation that repeat application of AASB 1 'First-time Adoption of Australian Accounting Standards' is permitted; Clarification of borrowing cost exemption in AASB 1; Clarification of the comparative information requirements when an entity provides an optional third column or is required to present a third statement of financial position in accordance with AASB 101 'Presentation of Financial Statements'; Clarification that servicing of equipment is covered by AASB 116 'Property, Plant and Equipment', if such equipment is used for more than one period; clarification that the tax effect of distributions to holders of equity instruments and equity transaction costs in AASB 132 'Financial Instruments: Presentation' should be accounted for in accordance with AASB 112 'Income Taxes'; and clarification of the financial reporting requirements in AASB 134 'Interim Financial Reporting' and the disclosure requirements of segment assets and liabilities.

AASB 2012-10 Amendments to Australian Accounting Standards - Transition Guidance and Other Amendments

The consolidated entity has applied AASB 2012-10 amendments from 1 July 2013, which amends AASB 10 and related standards for the transition guidance relevant to the initial application of those standards. The amendments clarify the circumstances in which adjustments to an entity's previous accounting for its involvement with other entities are required and the timing of such adjustments.

Interpretation 20 Stripping Costs in the Production Phase of a Surface Mine and AASB 2011-12 Amendments to Australian Accounting Standards arising from Interpretation 20

The consolidated entity has applied Interpretation 20 and its consequential amendments from 1 July 2013. The Interpretation clarifies when production stripping costs should lead to the recognition of an asset and how that asset should be initially and subsequently measured. The Interpretation only deals with waste removal costs that are incurred in surface mining activities during the production phase of the mine.

AASB 2011-4 Amendments to Australian Accounting Standards to Remove Individual Key Management Personnel Disclosure Requirement

The consolidated entity has applied 2011-4 from 1 July 2013, which amends AASB 124 'Related Party Disclosures' by removing the disclosure requirements for individual key management personnel ('KMP'). Corporations and Related Legislation Amendment Regulations 2013 and Corporations and Australian Securities and Investments Commission Amendment Regulation 2013 (No.1) now specify the KMP disclosure requirements to be included within the directors' report.

v. **New Accounting Standards and Interpretations not yet mandatory or early adopted**

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the Group for the annual reporting period ended 30 June 2014. The Group's assessment of the impact of these new or amended Accounting Standards and Interpretations, most relevant to the Group, are set out below.

AASB 9 Financial Instruments and its consequential amendments

This standard and its consequential amendments are applicable to annual reporting periods beginning on or after 1 January 2018 and completes phases I and III of the IASB's project to replace IAS 39 (AASB 139) 'Financial Instruments: Recognition and Measurement'. This standard introduces new classification and measurement models for financial assets, using a single approach to determine whether a financial asset is measured at amortised cost or fair value. The accounting for financial liabilities continues to be classified and measured in accordance with AASB 139, with one exception, being that the portion of a change of fair value relating to the entity's own credit risk is to be presented in other comprehensive income unless it would create an accounting mismatch. Chapter 6 'Hedge Accounting' supersedes the general hedge accounting requirements in AASB 139 and provides a new simpler approach to hedge accounting that is intended to more closely align with risk management activities undertaken by entities when hedging financial and non-financial risks. The consolidated entity will adopt this standard and the amendments from 1 July 2018 but the impact of its adoption is yet to be assessed by the consolidated entity.

AASB 2012-3 Amendments to Australian Accounting Standards - Offsetting Financial Assets and Financial Liabilities

The amendments are applicable to annual reporting periods beginning on or after 1 January 2014. The amendments add application guidance to address inconsistencies in the application of the offsetting criteria in AASB 132 'Financial Instruments: Presentation', by clarifying the meaning of 'currently has a legally enforceable right of set-off'; and clarifies that some gross settlement systems may be considered to be equivalent to net settlement. The adoption of the amendments from 1 July 2014 will not have a material impact on the consolidated entity.

AASB 2013-3 Amendments to AASB 136 - Recoverable Amount Disclosures for Non-Financial Assets

These amendments are applicable to annual reporting periods beginning on or after 1 January 2014. The disclosure requirements of AASB 136 'Impairment of Assets' have been enhanced to require additional information about the fair value measurement when the recoverable amount of impaired assets is based on fair value less costs of disposals. Additionally, if measured using a present value technique, the discount rate is required to be disclosed. The adoption of these amendments from 1 July 2014 may increase the disclosures by the consolidated entity.

AASB 2013-4 Amendments to Australian Accounting Standards - Novation of Derivatives and Continuation of Hedge Accounting

These amendments are applicable to annual reporting periods beginning on or after 1 January 2014 and amends AASB 139 'Financial Instruments: Recognition and Measurement' to permit continuation of hedge accounting in circumstances where a derivative (designated as hedging instrument) is novated from one counter party to a central counterparty as a consequence of laws or regulations. The adoption of these amendments from 1 July 2014 will not have a material impact on the consolidated entity.

AASB 2013-5 Amendments to Australian Accounting Standards - Investment Entities

These amendments are applicable to annual reporting periods beginning on or after 1 January 2014 and allow entities that meet the definition of an 'investment entity' to account for their investments at fair value through profit or loss. An investment entity is not required to consolidate investments in entities it controls, or apply AASB 3 'Business Combinations' when it obtains control of another entity, nor is it required to equity account or proportionately consolidate associates and joint ventures if it meets the criteria for exemption in the standard. The adoption of these amendments from 1 July 2014 will have no impact on the consolidated entity.

Annual Improvements to IFRSs 2010-2012 Cycle

These amendments are applicable to annual reporting periods beginning on or after 1 July 2014 and affects several Accounting Standards as follows: Amends the definition of 'vesting conditions' and 'market condition' and adds definitions for 'performance condition' and 'service condition' in AASB 2 'Share-based Payment'; Amends AASB 3 'Business Combinations' to clarify that contingent consideration that is classified as an asset or liability shall be measured at fair value at each reporting date; Amends AASB 8 'Operating Segments' to require entities to disclose the judgements made by management in applying the aggregation criteria; Clarifies that AASB 8 only requires a reconciliation of the total reportable segments assets to the entity's assets, if the segment assets are reported regularly; Clarifies that the issuance of AASB 13 'Fair Value Measurement' and the amending of AASB 139 'Financial Instruments: Recognition and Measurement' and AASB 9 'Financial Instruments' did not remove the ability to measure short-term receivables and payables with no stated interest rate at their invoice amount, if the effect of discounting is immaterial; Clarifies that in AASB 116 'Property, Plant and Equipment' and AASB 138 'Intangible Assets', when an asset is revalued the gross carrying amount is adjusted in a manner that is consistent with the revaluation of the carrying amount (i.e. proportional restatement of accumulated amortisation); and Amends AASB 124 'Related Party Disclosures' to clarify that an entity providing key management personnel services to the reporting entity or to the parent of the reporting entity is a 'related party' of the reporting entity. The adoption of these amendments from 1 July 2014 will not have a material impact on the consolidated entity.

Annual Improvements to IFRSs 2011-2013 Cycle

These amendments are applicable to annual reporting periods beginning on or after 1 July 2014 and affects four Accounting Standards as follows: Clarifies the 'meaning of effective IFRSs' in AASB 1 'First-time Adoption of Australian Accounting Standards'; Clarifies that AASB 3 'Business Combination' excludes from its scope the accounting for the formation of a joint arrangement in the financial statements of the joint arrangement itself; Clarifies that the scope of the portfolio exemption in AASB 13 'Fair Value Measurement' includes all contracts accounted for within the scope of AASB 139 'Financial Instruments: Recognition and Measurement' or AASB 9 'Financial Instruments', regardless of whether they meet the definitions of financial assets or financial liabilities as defined in AASB 132 'Financial Instruments: Presentation'; and Clarifies that determining whether a specific transaction meets the definition of both a business combination as defined in AASB 3 'Business Combinations' and investment property as defined in AASB 140 'Investment Property' requires the separate application of both standards independently of each other. The adoption of these amendments from 1 July 2014 will not have a material impact on the consolidated entity.

AASB 2013-9 Amendments to Australian Accounting Standards – Conceptual Framework, Materiality and Financial Instruments

Part A of this Standard applies to annual reporting periods ending on or after 20 December 2013. Part B of this Standard applies to annual reporting periods beginning on or after 1 January 2014. Part C of this Standard applies to annual reporting periods beginning on or after 1 January 2015. Part A of this Standard makes various editorial corrections to Australian Accounting Standards. It updates references to the Framework in a manner that is consistent with the amendments made by the International Accounting Standards Board (IASB) in its corresponding pronouncements. Part B of this Standard makes amendments to particular Australian Accounting Standards to delete references to AASB 1031. Part C of this Standard amends AASB 9 Financial Instruments to add Chapter 6 Hedge accounting and makes consequential amendments to AASB 9 and numerous other Standards. Part C also amends AASB 9 to permit requirements relating to the "own credit risk" of financial liabilities measured at fair value to be applied without applying the other requirements of AASB 9 at the same time. Furthermore, Part C of this Standard amends the mandatory effective date of AASB 9 so that AASB 9 is required to be applied for annual reporting periods beginning on or after 1 January 2017 instead of 1 January 2015. The adoption of these amendments will not have a material impact on the consolidated entity.

Note 2 Revenue

	Consolidated Entity	
	2014	2013
	\$	\$
Other income		
Interest	66,597	93,000
Research and development tax offset income *	135,974	-
Total Revenue	202,571	93,000

* An additional \$1,027,769 received in 2014 (2013 \$nil) as part of the R&D tax offset has been applied against the Exploration Expenditure asset disclosed in Note 12.

Note 3 Loss for the Financial Year

	Consolidated Entity	
	2014	2013
	\$	\$
The net loss for the financial year has been arrived at after charging the following:		
Expenses		
Professional costs for R & D tax offset claim	93,099	-
Rental expense	22,683	22,681
Superannuation contribution expense	13,015	25,389
Superannuation contributions capitalised	92,405	59,915
Loss on disposal of property, plant and equipment	4,337	1,637

Note 4 Income Tax Expense

	Consolidated Entity	
	2014	2013
	\$	\$
a. The prima facie tax/(benefit) on loss before tax is reconciled to the income tax as follows:		
Prima facie tax/(benefit) on loss before tax at 30% (2013: 30%)	(665,049)	(196,642)
Add:		
Tax effect of:		
- non-allowable items	10,875	-
- net current year tax losses not recognised, temporary differences and deductible exploration expenditure.	722,951	220,005
	<u>68,777</u>	<u>23,363</u>
Less:		
Tax effect of:		
- Research and Development tax offset income	(40,793)	-
- capitalised share placement costs	(27,984)	(23,363)
Income tax benefit/(expense) attributable to loss	<u>-</u>	<u>-</u>
The deferred tax asset arising from tax losses has not been recognised as an asset because recovery is not probable:		
Tax losses carried forward	5,599,474	5,419,328
Temporary differences – exploration costs	(2,863,008)	(2,866,641)
Temporary differences – other	93,526	26,725
Net Deferred tax asset not recognised	<u>2,829,992</u>	<u>2,579,412</u>
Balance of franking account at year end	<u>-</u>	<u>-</u>

Potential deferred tax assets attributable to tax losses carried forward have not been brought to account because Directors do not believe it is appropriate to regard realisation of the deferred tax assets as probable.

Future benefits attributable to temporary differences have not been brought to account as the Directors do not believe it is appropriate to regard the realisation of such benefits as probable. These benefits will only be obtained if:

- (a) the company derives future assessable income of a nature and of an amount sufficient to enable the benefit from the deduction for the loss to be realized;
- (b) the company continue to comply with the conditions for deductibility imposed by law, and
- (c) no changes in tax legislation adversely affect the company in realizing the benefit from the deductibility for the loss.

Rimfire Pacific Mining NL and its wholly owned entity have not opted to enter the tax consolidation regime as at 30 June 2014.

Note 5 Auditor's Remuneration

	Consolidated Entity	
	2014	2013

	2014	2013
	\$	\$
CURRENT		
Prepaid expenses (insurance, rent, body corporate)	23,915	18,825

Note 12 **Exploration & Evaluation Costs Carried Forward**

	Consolidated Entity	
	2014	2013
	\$	\$
NON-CURRENT		
Exploration Expenditure		
Costs carried forward in respect of areas of interest in:		
– exploration and evaluation phases	9,543,362	9,555,471
Opening balance	9,555,471	7,279,388
Additional expenditure	2,629,444	2,379,295
Research and development tax offset	(1,027,769)	-
Impairment write off	(1,613,784)	(103,212)
Closing balance	9,543,362	9,555,471

Ultimate recoupment of these costs is dependent on successful development and commercial exploration or alternatively sale of the respective areas of interest.

Exploration expenditure written off during the year relate to mining tenements EL6106 and EL6144. The company elected to concentrate exploration activity on more prospective areas of interest and consequently these tenements were not renewed.

— Issued in the previous year	-	84,683,333
At reporting date	687,757,495	610,529,976

b. Share-based payments

On 14 May 2014, 843,000 shares were issued to DJG & Associates for consultancy services at an issue price of \$0.043 per share and a total transactional value of \$36,249.

c. Capital Management

Management controls the capital of the consolidated entity in order to ensure that the Company remains a going concern as a primary objective and is able to deliver suitable exploration, as the circumstances allow. This is done, to the best of management's ability in the prevailing business and economic circumstances. The consolidated entity's debt and capital includes ordinary share capital, listed options and financial liabilities.

The Board may in the future adjust the capital structure to take advantage of favourable costs of capital and issue further shares in the market. The Board has no current plans to adjust the capital structure. There are no plans to distribute dividends in the next financial year.

The consolidated entity is not subject to any externally imposed capital requirements.

d. Options

No options were issued or exercised during the current financial year.

Note 16 Parent Entity Information

Set out below is the supplementary information about the parent entity.

	2014	2013
	\$	\$
Current assets	2,462,841	1,037,719
Total assets	12,715,124	11,311,490
Current liabilities	636,689	259,976
Total liabilities	636,689	259,976
Issued capital	25,104,814	21,861,063
Accumulated losses	(13,026,379)	(10,809,549)
Total equity	12,078,435	11,051,514
Loss of the parent entity	(2,216,830)	(655,477)
Comprehensive loss of the parent entity	(2,216,830)	(655,477)

Parent Entity Commitments:

All capital and operating commitments of the group have been entered into by the Parent Entity. Refer to note 17 for these commitments. The accounting policies of the parent entity are consistent with those of the consolidated entity, as disclosed in note 1.

Note 17 Capital and Leasing Commitments

	Consolidated Entity	
	2014	2013
	\$	\$
a. Operating Lease Commitments		
<u>Office & Other Premises</u>		
Payable		
— not later than 1 year	22,682	17,011
— later than 1 year but not later than 5 years	17,011	-
	39,693	17,011

The office premises lease is a non-cancellable lease with a two-year term, with rent payable monthly in advance, and commenced on 1st April 2014. The lease agreement has a fixed yearly payment value of \$22,682 per annum plus GST. The lease allows for sub-letting of all lease areas.

b. **Capital Expenditure Commitments**

The consolidated entity is committed to capital expenditure on its various mining tenements and leases as follows:

	Consolidated Entity	
	2014	2013
	\$	\$
Payable		
— not later than 1 year	225,500	335,500
— later than 1 year but not later than 5 years	450,000	671,000
	675,500	1,006,500

Note 18 Contingent Liabilities and Contingent Assets

The Directors are not aware of any matters or circumstances which have arisen during or since the financial year which may significantly affect the operations of the consolidated entity, the results of those operations or state of affairs of the consolidated entity in future years.

Note 19 **Segment Reporting**

Business and Geographical Segments

The consolidated entity operates predominantly in one business and geographic segment, being mineral exploration and prospecting within Australia.

Segment information is presented using a “management approach”, i.e. Segment information is provided on the same basis as information used for internal reporting purposes by the board of directors. At regular intervals, the board is provided management information at a group level for the group’s cash position, the carrying values of exploration permits and a group cash flow forecast for the next 12 months of operation. On this basis, no segment information is included in these financial statements.

Note 20 **Related Party Details**

	2014	2013
	\$	\$
Transactions between related parties are on normal commercial terms and conditions no more favourable than those available to other parties unless otherwise stated.		
Transactions with director related parties:		
(i) In the current financial year the wife of Mr J Kaminsky was paid in respect of administrative services.	21,174	43,011

Note 21 **Events Occurring after the Reporting Period**

There are no matters or circumstances which have arisen since the end of the financial year which significantly affected or may significantly affect the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future financial years.

Note 22 **Cash Flow Information**

	Consolidated Entity	
	2014	2013
	\$	\$
a. Reconciliation of Cash Flow from Operations with Loss after Income Tax		
Loss after income tax	(2,216,830)	(655,477)
Non-cash flows in loss		
Depreciation	46,513	35,215
Impairment write off on exploration costs	1,613,784	103,212
Loss on disposal of PPE	4,337	1,637
Changes in assets and liabilities relating to operations		
(Increase)/decrease in prepayments	(5,090)	(6,892)
(Increase)/decrease in other receivables	194,944	106,474
Increase/(decrease) in trade creditors and accruals	113,242	(9,118)
Increase/(decrease) in provisions	8,523	7,227
Cash flows used in operations	(240,577)	(417,722)

b. Cash not available for use
There was no cash as at the end of the year which was unavailable for use.

c. Non-cash Financing and Investing Activities
There were no non-cash financing and investing activities carried out during the year.

Note 23 Financial Risk Management

a. Financial Risk Management Objectives and Policies

The consolidated entity's activities expose it to a variety of financial risks: market risk (including interest rate risk), credit risk and liquidity risk. The consolidated entity's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the consolidated entity. The consolidated entity uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate and other risks.

Risk management is carried out by senior executives under policies approved by the Board of Directors. These policies include identification and analysis of the risk exposure of the consolidated entity and appropriate procedures, controls and risk limits.

Market risk

Interest rate risk

The consolidated entity's main interest rate risk arises from its holdings of cash and cash equivalents on deposit. Deposits held at variable rates expose the consolidated entity to interest rate risk. Deposits held at fixed rates expose the consolidated entity to fair value risk. The consolidated entity's exposure to interest rate risk is set out in Note 23(b).

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the consolidated entity. The consolidated entity exposure to credit risk is limited to security deposits provided to landlords and other third parties. The maximum exposure to credit risk at the reporting date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the statement of financial position and notes to the financial statements.

Liquidity risk

Vigilant liquidity risk management requires the consolidated entity to maintain sufficient liquid assets (mainly cash and cash equivalents) to be able to pay debts as and when they become due and payable.

The consolidated entity manages liquidity risk by maintaining adequate cash reserves by continuously monitoring actual and forecast cash flows and matching the maturity profiles of financial assets and liabilities.

Categorisation of financial instruments

Financial assets	Note	Category	Carrying value 2014 \$	Carrying value 2013 \$
Cash & cash equivalents	7	N/A	2,355,073	909,465
Trade and other receivables	8	Trade and other receivables at amortised cost	234,080	259,656
Financial liabilities				
Trade and other payables	13	Financial liabilities measured at amortised cost	615,314	247,124

Note 23 Financial Risk Management (Cont'd)

b. **Interest Rate Risk**

The consolidated entity's exposure to interest rate risk, which is the risk that a financial instrument's value will fluctuate as a result of changes in market interest rates on classes of financial assets and financial liabilities, is as follows:

	Floating Interest Rate		Fixed Interest Rate		Non-interest Bearing		Total	
	2014	2013	2014	2013	2014	2013	2014	2013
	\$		Maturings Within One Year		\$		\$	
Financial Assets								
Cash	99,869	108,515	2,254,253	800,000	950	950	2,355,073	909,465
Receivables	150,000	150,000	-	-	84,080	109,656	234,080	259,656
Other Financial Assets	-	-	-	-	-	-	-	-
Total Financial Assets	249,869	258,515	2,254,253	800,000	85,030	110,606	2,589,153	1,169,121
Financial Liabilities								
Trade and sundry creditors	-	-	-	-	615,314	247,124	615,314	247,124
Total Financial Liabilities	-	-	-	-	615,314	247,124	615,314	247,124
Net Financial Assets	249,869	258,515	2,254,253	800,000	(530,284)	(136,518)	1,973,839	921,997

Note 23 Financial Risk Management (Cont'd)

Net Fair Values

c.

The carrying amounts of financial assets and liabilities approximate the net fair value unless otherwise stated.

The following methods and assumptions are used to determine the net fair values of financial assets and liabilities:

Recognised financial instruments

Cash: The carrying amount approximates fair value.

Trade and other receivables: The carrying amount approximates fair value.

Term Deposits: The carrying amount approximates fair value.

Trade and other payables: The carrying amount approximates fair value.

d. Sensitivity Analysis

The group has performed a sensitivity analysis relating to its exposure to interest rate risk at reporting date. This sensitivity analysis demonstrates the effect on the current year results and equity which could result from a change in these risks.

Interest Rate Sensitivity Analysis

At 30 June 2014, the effect on loss after tax and equity as a result of changes in the interest rate, with all other variables remaining constant would be as follows:

	Consolidated Entity	
	2014	2013
	\$	\$
Change in loss after tax		
- Increase in interest rate by 2%	4,997	5,170
- Decrease in interest rate by 2%	(4,997)	(5,170)
Change in equity		
- Increase in interest rate by 2%	4,997	5,170
- Decrease in interest rate by 2%	(4,997)	(5,170)

The above changes are based on the effect of an interest rate change in relation to funds held in deposit with financial institutions

Note 24

Company Details

The registered office and principal place of business of the Company is:

Rimfire Pacific Mining NL
 "Exchange Tower"
 Suite 411, 530 Little Collins Street
 Melbourne VIC 3000

In the directors' opinion:

1. the attached financial statements and notes and the Remuneration Report thereto comply with the Corporations Act 2001, the Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements;
2. the attached financial statements and notes thereto comply with International Financial Reporting Standards as issued by the International Accounting Standards Board as described in note 1 to the financial statements;
3. the attached financial statements and notes thereto give a true and fair view of the consolidated entity's financial position as at 30 June 2014 and of its performance for the financial year ended on that date;
4. there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable; and
5. The directors have been given the declarations required by section 295A of the Corporations Act 2001.

Signed in accordance with a resolution of directors made pursuant to section 295(5) of the Corporations Act 2001.

INDEPENDENT AUDITOR'S REPORT

To the members of Rimfire Pacific Mining NL

Report on the Financial Report

We have audited the accompanying financial report of Rimfire Pacific Mining NL, which comprises the consolidated statement of financial position as at 30 June 2014, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, notes comprising a summary of significant accounting policies and other explanatory information, and the directors' declaration of the consolidated entity comprising the company and the entities it controlled at the year's end or from time to time during the financial year.

Directors' Responsibility for the Financial Report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements comply with *International Financial Reporting Standards*.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. Those standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance about whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation of the financial report that gives a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*. We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of Rimfire Pacific Mining NL, would be in the same terms if given to the directors as at the time of this auditor's report.

Opinion

In our opinion:

- (a) the financial report of Rimfire Pacific Mining NL is in accordance with the *Corporations Act 2001*, including:
 - (i) giving a true and fair view of the consolidated entity's financial position as at 30 June 2014 and of its performance for the year ended on that date; and
 - (ii) complying with Australian Accounting Standards and the *Corporations Regulations 2001*; and
- (b) the financial report also complies with *International Financial Reporting Standards* as disclosed in Note 1.

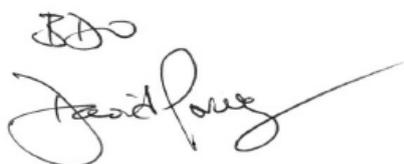

Report on the Remuneration Report

We have audited the Remuneration Report included in pages 6 to 9 of the directors' report for the year ended 30 June 2014. The directors of the company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

Opinion

In our opinion, the Remuneration Report of Rimfire Pacific Mining NL for the year ended 30 June 2014 complies with section 300A of the *Corporations Act 2001*.
